2020年09月四级真题第2套

听力原文 / Transcripts

新闻听力原文 / News Report（英文）

College English Test, Band 4, Part 2, Listening Comprehension.
Section A, Directions. In this section you'll hear three new reports. At the end of each
new user report you'll hear two or three questions. Both the new
user report and the questions will be spoken only once. After you hear a question you must
choose the best answer from the four choices marked A, B, C, and D. Then mark the corresponding
letter on answer sheet 1 with a single line through the center.
News report 1. Annasa Satellite orbiting over Portugal took photographs that reveal the effects
of pollution from ships. One of the photos shows a thin film of clouds above the brilliant
blue of the North Atlantic. Cut by white lines of thicker clouds that look like scars.
NASA officials explained those thicker clouds are signs of ship traffic below. When ships
power their way through the ocean, they pump exhaust into the atmosphere just as cars
do. And those massive amounts of particles can cause clouds to form. Get enough of those
particles in one place as from the exhaust of a ship, and they can lead to the creation
of new clouds easily visible from space.
These clouds can be huge.
Some of them stretch hundreds of kilometers from end to end.
NASA officials said,
It's likely that these sorts of clouds are having some effect on the global climate, according
to NASA officials.
But scientists aren't yet sure what effect it has.
Question 2. What do NASA officials think about the thick clouds?
News Report 2.
Starved at a suburban supermarket in Melbourne, say they feel unsafe at work after security
guards were removed.
This came after a series of physical attacks and verbal abuse by customers. More than 50 workers
at the store have signed a letter calling for a permanent security guard following a series
of incidents including a customer threatening to attack a supervisor with a knife.
A security worker had guarded the store each night from 7pm until 12am.
But that had stopped suddenly on Monday, in Plesise said.
One worker said an angry customer had thrown a chicken at his head after complaining about
how long she had waited to be served.
Another worker said the lack of protection at the store made her feel uncomfortable at work.
However, the spokesman of the supermarket said the store had taken strong action in response
to incidents.
We have found very few instances of bad customer behavior at our store in the past year.
In the rare cases we have seen bad behavior, we have taken strong action in response, including
banning a customer from the store.
Questions 3 and 4 are based on the news report you have just heard.
Question 3.
For what purpose did the staff at a supermarket in Melbourne sign a letter?
Question 4. What did the spokesman of the supermarket say regarding the employees demand?
News Report 3. Drivers on their way to the Polish capital of Warsaw on Wednesday
morning found the road blocked by an unusual obstacle. Tons of liquid chocolate that spilled
onto the motorway. A truck carrying the sweet load, hit a road barrier and overturned, blocking
two lanes. The cracked tank spilled a pool of rapidly hardening chocolate, which quickly
covered the width of the road. While the driver was taken to hospital with a broken arm,
firefighters struggled to remove a reported 12 tons of solid chocolate from the road.
A representative for the firefighters told the local TV that removing the chocolate was worse than dealing
with snow.
After contacting the chocolate manufacturer, the firefighters resorted to spraying hot, pressurized water to
get rid of the sticky substance.
The local TV also noted that the cleanup spanned more than a mile, because drivers simply drove through
the chocolate after the crash, leaving a long chocolate trail.
But despite the sticky situation, firefighters and police attending to the cleanup were reportedly
cheerful about the long task ahead.
After all, who could be mad about 12 tons of chocolate?
Questions 5-7 are based on the news report you have just heard.
Question 5.
What did drivers on the motorway to water or find?
Question 6.
What does the report say about the accident?
Question 7. What did the firefighters representative tell the local TV?

长对话听力原文 / Conversations（英文）

Section B, Directions. In this section you will hear two long conversations. At the end of each conversation
you will hear four questions. Both the conversation and the questions will be spoken only once.
After you hear a question, you must choose the best answer from the four choices marked
A, B, C, and D. Then mark the corresponding letter on answer sheet 1 with a single line
through the center.
Conversation 1 Lisa, why did you pay for your meal with cash instead of the payment
apps on your phone?
Well, I've gone back to cash. I'm only using payment apps if that's the only option.
I'm trying to save money for a new phone, and I find that using cash rather than payment apps
helps me to save.
But how? Money is money, isn't it? I don't think it matters whether you take it out
of the bank and put it in your wallet, or simply transfer it from your bank account to
the seller's bank account using an app.
No, I believe it does matter. It's a psychological phenomenon. I believe we have less
connection with the value of our money when we just tap the approved buttons on our phones.
You might have a point, since I stopped carrying cash around and started using my phone
apps to pay, I may have developed a tendency to buy more small or non-essential items.
That's highly possible. Think about the amount of time we spend with our phones in our
and all the things we do with our phones.
It sometimes seems that our phone is buying the product for us, not ourselves.
So cash is payment affects our ability to budget?
I believe so.
If we spend a hundred-year-old earning cash,
we realize that we don't have that hundred-year-old earning to spend on something else.
But if we're spending electronically,
we are less likely to make that mental calculation.
I stopped using my credit card because I found I was spending excessively.
Perhaps they should take the same approach you're paying using my phone.
It's worth considering.
Questions 8 to 11 are based on the conversation you have just heard.
Question 8. Why did the woman decide to go back to cash for payment?
Question 9. What happens when people use apps for payment according to the woman?
Question 10. What might the man tend to buy?
with payment apps.
Question 11. What is the man think of electronic payment?
Condensation 2
Hello Mr. Brown, I was expecting your call. My secretary told me you were having some problems
with the wooden table. Is that right?
No, no, the table is fine. The problem is the chairs.
Oh, the chairs. So what exactly is the issue?
Well, put simply, these are not the chairs my wife and I selected in your store last week.
There must have been some confusion with our order.
Oh, I see. I'm looking through my files now, and I see that the delivery was this morning.
Is that correct?
Yes.
Do you mind describing the chairs that were delivered to your apartment, Mr. Brown?
Sure. These have a flat back with a rounded top and a very heavy.
They like brown and look kind of cheap.
The ones we ordered were dark brown to match the table.
Right, of course, it says here you purchase the Arlington table and four Milano chairs.
As you said, there must have been some confusion with the order.
I'm terribly sorry.
We will send a van to collect those four and replace them with the Milano you purchased.
Will tomorrow 9 a.m. be okay, Mr. Brown?
Yes, that would be great. Thank you.
Good. Did everything else you ordered for us arrive okay?
Yes, I think so. Let me check.
The mirror and two paintings are here.
The two coffee tables are also here and a sofa.
Yes, we haven't noticed anything else wrong on this thing, but if we do, we will certainly let you know.
Okay, great. Once again, I'm sorry for the confusion and trouble caused.
Questions 12-15 are based on the conversation you have just heard.
Question 12. Why did the man call the woman?
Question 13.
What do the women ask the man to do?
Question 14.
What do the women promise to do for the man?
Question 15.
What did the woman do at the end of the conversation?

听力篇章原文 / Passages（英文）

Section C, directions. In this section you will hear three passages. At the end of each passage, you will hear
three or four questions. Both the passage and the questions will be spoken only once.
After you hear a question, you must choose the best answer from the four choices marked
A, B, C, and D. Then mark the corresponding letter on answer sheet 1 with a single line
through the center.
Passage 1. Do you have too much stuff? Are you dare we say it? Untidy? Say hello to a TV
show called Tiding Up with Mary Condo. A home improvement show based on her wildly popular
book, the life-changing magic of Tiding Up. In the show, Marie Condo acts as a tiny garbage
fairy for messy people, visiting their houses to share the wisdom of the Konmari method.
This method is simple in theory, but can be endlessly complex and practice.
You divide all the stuff in your house, all of it into several categories, and then examine
each item, all of them to see if it sparks joy.
If it does, you keep it.
If it doesn't, you thank it, and neatly discard it.
So, is the TV show inspiring people to tidy up?
First hand accounts seem to indicate a small wave of people
bringing piles of donation bags to used good stores.
One store received thousands of bags of used possessions in one day.
January is usually the stores slow-season for donations
because it's cold and people don't want to bother,
but not this January.
People seemed determined to clean up their homes. One used bookstore received a
month's worth of books in donations in a week when a man gave over 50 boxes of
books from his home. It seems Maurice TV show is having a big impact after all.
Question 16 to 18 are based on the passage you have just heard.
Question 16. What is Marie Condos TV show about?
Question 17. What things can be kept in one's home, according to Marie Kondo?
Question 18. What do we learn about one used bookstore this January?
Passage 2 At just 12 years old, Mike Hanan is making a difference in his community.
One lunch at a time.
Mike's lunches of love has fed more than 2,000 of the town's most vulnerable residents.
Mike delivers meals to the homeless. It's like a way to give people joy, maybe spark
something in them that can change them. Mike told WBCTV,
the mayor of Mike's town feels that Mike is a great community leader, especially in such times
of so much negative news, while his father commented on how proud he was of his son. Yet,
Mike isn't looking for praise, but kindness in return. He hopes his acts of charity will
influence others to spread positive actions in their own towns.
Mike includes a handwritten message of joy on each bag, his message and star power has spread
all over the country.
To date, his online page to raise funds has brought in more than $44,000 and counting, raising
more than $17,000 in just one day, with the help of many famous actors and others.
People from all over the country are sending special handcrafted bags to help the young man
with his mission to help those in need.
Many are hoping the simple act of kindness spreads.
Mike is seen as hope for the future of the town, the country, and the world.
Questions 19-21 are based on the passage you have just heard.
Question 19-What does Mike Hanon do to help people in his town?
Question 20. What does Mike hope others will do?
Question 21. How are people all over the country responding to what Mike is doing?
Passage 3. In a recent study carried out by psychologists on the disruptive effect of smartphones.
Two groups of college students were given word search puzzles. The first group was told to complete the
puzzles with its participants
smartphones in their line of sight. The second group, however, was told that the phones
would interfere with the equipment in the experiment and would need to be moved away from
the testing area. Midway through the second groups solving of the puzzles, the experiment
had called one of the phones and let it ring for a while before hanging up. Many of
the students in that group were unable to focus from then on, becoming anxious and performing
more poorly than the first group.
Use of electronics has also been known to lead to a decline in human interactions.
Rather than having real life conversations, many express emotions and engage in deep conversations
through social media sites.
Many students use their phones and computers during class for non-academic activities, which
leads to poor grades.
Perhaps the most dramatic impact is the reduction in the amount of sleep, which leads to poor
health and weight gain.
Technology is a great tool.
However, it's important to recognise its downside.
Lack of sleep, reduction of productivity and weight gain are only a few.
If we are not careful about all these minor problems right now, the effect on the future
generation is going to be much bigger.
Question 23 What do we learn about many of the students in the second test group after the phone rang?
Question 24
According to the passage, what is the most dramatic impact of smartphone use?
Question 25. What does the speaker suggest people do?
This is the end of listening comprehension.
