2023年12月四级真题第3套

原卷 / Question Paper · 年份 2023 | 月份 12 | 第 三 套 | 时长 125 分钟 | 满分 710（及格 425）

Part I 写作 (Writing)

Directions: Suppose the university newspaper is inviting submissions from the students for its coming edition on what in their university impresses them most. You are now to write an essay for submission. You will have 30 minutes to write the essay. You should write at least 120 words but no more than 180 words.

建议时间：30 分钟 | 字数：120-180 | 分值：15

作答区

Part II 听力理解 (Listening Comprehension)

Section A news

短新闻

听力音频：audio/SectionA.mp3（见离线包 papers 目录对应 audio 文件夹）

1. **Why did the police officer stop the SUV car?**

A. He noticed the driver was too young to drive.
B. He found there was no one sitting at the wheel.
C. He thought something must be wrong with the driver.
D. He saw the driver changing lanes much too frequently.

2. **What did the boy tell the police officers he was planning to do?**

A. Buy a sports car.
B. Drive across town.
C. Leave California.
D. Visit his sister.

3. **What does the report say we have not yet understood about mobile phones?**

A. How they change the way we shop.
B. How they alter human skeletons.
C. How they cause increased headaches.
D. How they affect our communication.

4. **What happens to the skin when rubbed or pressed constantly?**

A. It loosens.
B. It brightens.
C. It hardens.
D. It softens.

5. **What is the village going to do for the cat named Wilbur?**

A. Create Internet pages for him.
B. Ask a local pet shop to adopt him.
C. Name an orange tree after him.
D. Hold a birthday party for him.

6. **What do we learn from the report about the cat?**

A. He is a bold and aggressive pet.
B. He pays regular visits to village shops.
C. He once bit a doctor s receptionist.
D. He often seeks food from strangers.

7. **What does the pub owner Leslie Harper say about the cat?**

A. He is fond of luxury cat food.
B. He likes to stay in villagers’ houses.
C. He knows everybody in the village.
D. He often seeks food around her pub.

Section B conversations

长对话

听力音频：audio/SectionB.mp3（见离线包 papers 目录对应 audio 文件夹）

1. **What's are the speakers talking about in this conversation?**

A. Who to order the food.
B. Whether to have sandwiches.
C. When to go for their meal.
D. Where to have their lunch.

2. **Where did the speakers see Bridget Clark the famous movie star?**

A. In the shopping center nearby.
B. In the expensive Italian style diner.
C. At the Sandwich Place on Camden Street.
D. At the American restaurant they frequent.

3. **Why does the woman say she needs to get back by 2030?**

A. There is to be a conference call.
B. She has to meet with her boss then.
C. There will be crowds of people waiting for her.
D. She will have a photo taken with Brigette Clark.

4. **Why does the woman say Jeremy should throw his soup in the bin?**

A. She knows Jeremy dislikes having soup for lunch.
B. She doesn’t think his wife cooks well.
C. She feels Jeremy would rather dine out.
D. She has found the soup smells terrible.

5. **Who is the man talking to in the conversation?**

A. A landlady.
B. A waitress.
C. A receptionist.
D. A saleswoman.

6. **What do we learn about the man's father-in-law from the conversation?**

A. He was involved in a terrible car accident last April.
B. He has much difficulty getting up and down stairs.
C. He is expected to undergo a knee operation.
D. He prefers to stay next door to the children.

7. **Why does the man say they will explore all the options available?**

A. To please his parents- in-law.
B. To find the best trip for his kids.
C. To satisfy his curiosity.
D. To compare prices.

8. **What does the woman suggest the man and his family do close to the end of the conversation?**

A. Visit a local art gallery.
B. Go on a boat trip.
C. Take some photos of the islands.
D. Try her hand-made clothing.

Section C passages

听力篇章

听力音频：audio/SectionC.mp3（见离线包 papers 目录对应 audio 文件夹）

1. **What does the passive say about artificial intelligence agents?**

A. They are more intelligent than many of us.
B. They have already become our new friends.
C. They have begun to affect our social behavior.
D. They play increasingly more important roles.

2. **What does the new study want to find out about using an artificial intelligence agents?**

A. Whether it might have any effect on the way we negotiate.
B. Whether it might actually outperform human negotiators.
C. Whether it can facilitate business transactions.
D. Whether it can speed up legal procedures.

3. **What did participants tend to do when assigned an AI agent to negotiate on their behalf.**

A. Choose to be tough.
B. Sympathize with their opponent.
C. Use deceptive strategies.
D. Appear to be pleasant.

4. **What do we learn about the benefits the participants gained from the healthy cooking course?**

A. They were perceived differently by some academics.
B. They still existed six months after the course ended.
C. They varied greatly among the course participants.
D. They were only measurable within seven weeks.

5. **What do the new research findings suggest about mental health benefits?**

A. They can be easily seen among participants in a healthy weight range.
B. They are related to participants’ initial cooking skills.
C. They are linked to cooking confidence and cooking satisfaction.
D. They actually result from eating more fruits and vegetables.

6. **What plays a role in determining who benefits most from learning to cook?**

A. Gender.
B. Confidence.
C. Health.
D. Practice.

7. **What does research show about our personal space?**

A. It keeps others away.
B. It causes discomfort.
C. It remains visible.
D. It varies in size.

8. **What happens if a mere acquaintance enters our intimate space?**

A. It makes us feel uncomfortable.
B. It renders the acquaintance a stranger.
C. It brings the acquaintance closer to us.
D. It causes the bubble around us to vanish.

9. **Where the people feel comfortable interacting with new acquaintances or strangers.**

A. In personal space.
B. In social space.
C. Within a distance of 18 inches.
D. Over 2 feet away from one another.

10. **When are the sizes of our personal bubbles fixed?**

A. When we begin to feel fear.
B. When we develop a sense of space.
C. When we are 3 or 4 years old.
D. When we enter our teens.

Part III 阅读理解 (Reading Comprehension)

Section A 选词填空

Word Bank（词库）

A) base
B) eagerly
C) especially
D) focus
E) indicator
F) overall
G) preached
H) prior
I) prompt
J) puzzle
K) quantified
L) recovery
M) reflected
N) story
O) strongly

When people set out to improve their health, they usually take a familiar path: starting a healthy diet, getting better sleep, and doing regular exercise. Each of these behaviors is important, of course, but they all __26__ on physical health—and a growing body of research suggests that social health is just as, if not more, important to __27__ well-being.
One recent study published in the journal PLOS ONE, for example, found that the strength of a person’ s social circle was a better __28__ of self-reported stress, happiness and well-being levels than fitness tracker data on physical activity, heart rate and sleep. That finding suggests that the “__29__ self” represented by endless amounts of health data doesn’ t tell the whole __30__ .
There’ s also a qualified self, which is who I am, what are my activities, my social network, and all of these aspects are not __31__ in any of these measurements.
This idea is supported by plenty of __32__ research. Studies have shown that social support—whether it comes from friends, family members or a spouse—is __33__ associated with better mental and physical health. A rich social life, these studies suggest, can lower stress levels, improve mood, encourage positive health behaviors and discourage damaging ones, boost heart health and improve illness __34__ rates.
Social isolation, meanwhile, is linked to higher rates of physical diseases and mental health conditions. It’ s a significant problem, __35__ since loneliness is emerging as a widespread public health problem in many countries.

空格题号：26、27、28、29、30、31、32、33、34、35

Section B 段落匹配

Directions: 阅读下列段落，为每个句子选出所对应的段落。每个段落可能被选一次、多次或不被选择。

A As a parent of two boys at primary school, I worry about the issues associated with teenagers and social media. Newspapers are constantly filled with frightening accounts of drug addiction and aggressive behaviour supposedly caused by violent videogames. But even when these accounts touch on real concerns, they do not really reflect the great mass of everyday teenage social behaviour: the online chat, the texting, the surfing, and the emergence of a new teenage sphere that is conducted digitally.

B New technologies always provoke generational panic, which usually has more to do with adult fears than with the lives of teenagers. In the 1930s, parents worried that radio was gaining “an irresistible hold of their children”. In the 80s, the great danger was the Sony Walkman (随身听). When you look at today’ s digital activity, the facts are much more positive than you might expect.

C Indeed, social scientists who study young people have found that their digital use can be inventive and even beneficial. This is true not just in terms of their social lives, but their education too. So if you use a ton of social media, do you become unable, or unwilling, to engage in face-to-face contact? The evidence suggests not. Research by Amanda Lenhart of the Pew Research Centre, a US think tank, found that the most passionate texters are also the kids most likely to spend time with friends in person. One form of socialising doesn’ t replace the other. It expands it.

D “Kids still spend time face to face,” Lenhart says. Indeed, as they get older and are given more freedom, they often ease up on social networking. Early on, the web is their “third space”, but by the late teens, it’ s replaced in reaction to greater independence. They have to be on Facebook, to know what’ s going on among friends and family, but they are ambivalent (有矛盾心理的) about it, says Rebecca Eynon, a research fellow at the Oxford Internet Institute, who has interviewed about 200 British teenagers over three years. As they gain experience with living online, they begin to adjust their behaviour, struggling with new communication skills, as they do in the real world.

E Parents are wrong to worry that kids don’ t care about privacy. In fact, they spend hours changing Facebook settings or using quick-delete sharing tools, such as Snapchat, to minimise their traces. Or they post a photograph on Instagram, have a pleasant conversation with friends and then delete it so that no traces remain.

F This is not to say that kids always use good judgment. Like everyone else, they make mistakes—sometimes serious ones. But working out how to behave online is a new social skill. While there’ s plenty of drama and messiness online, it is not, for most teens, a cycle of non-stop abuse: a Pew study found only 15% of teens said someone had bullied them online in the last 12 months.

G But surely all this short-form writing is affecting literacy? Certainly, teachers worry. They say that kids use overly casual language and text-speak in writing, and don’ t have as much patience for long reading and complex arguments. Yet studies of first-year college papers suggest these anxieties may be partly based on misguided nostalgia (怀旧). When Stanford University scholar Andrea Lunsford gathered data on the rates of errors in “freshman composition: papers going back to 1917, she found that they were virtually identical to today.

H But even as error rates stayed stable, student essays have blossomed in size and complexity. They are now six times longer and, unlike older “what I did this summer” essays, they offer arguments supported by evidence. Why? Computers have vastly increased the ability of students to gather information, sample different points of view and write more fluidly.

I When linguist Naomi Baron studied students’ instant messaging even there she found surprisingly rare usage of short forms such as “u” for “you”, and as students got older, they began to write in more grammatical sentences. That is because they want to appear more adult, and they know how adults are expected to write. Clearly, teaching teens formal writing is still crucial, but texting probably isn’ t destroying their ability to learn it.

J It is probably true that fewer kids are heavy readers compared with two generations ago, when cheap paperbacks boosted rates of reading. But even back then, a minority of people—perhaps 20%—were lifelong heavy readers, and it was cable TV, not the internet, that struck a blow at that culture in the 1980s. Still, 15% or more of kids are found to be deeply bookish. In fact, the online world offers kids remarkable opportunities to become literate and creative because young people can now publish ideas not just to their friends, but to the world. And it turns out that when they write for strangers, their sense of “authentic audience” makes them work harder, push themselves further, and create powerful new communicative forms.

K Few would deny that too much time online can be harmful. Some of the dangers are emotional: hurting someone from a distance is not the same as hurting them face to face. If we’ re lucky, the legal environment will change to make teenagers’ online lives less likely to haunt them later on. Just last week, California passed a law allowing minors to demand that internet firms erase their digital past and the EU has considered similar legislation.

L Distraction is also a serious issue. When kids switch from chat to music to homework, they are indeed likely to have trouble doing each task well. And studies show that pupils don’ t fact-check information online “smart searching” is a skill schools need to teach urgently. It’ s also true that too much social networking and game playing can cut into schoolwork and sleep. This is precisely why parents still need to set firm boundaries around it, as with any other distraction.

M So what’ s the best way to cope? The same boring old advice that applies to everything in parenting: moderation. Rebecca Eynon argues that it’ s key to model good behaviour. Parents who stare non -stop at their phones and don’ t read books are likely to breed kids who will do the same. As ever, we ought to be careful about our own behaviour.

待匹配句子

36. Research has found the use of digital technology benefits not only teenagers’ social lives but also their studies.
37. It is urgent that schools teach kids how to verify online information.
38. Students now write longer and more complex essays than their counterparts in previous decades while the error rates remain unchanged.
39. Newspaper reports of teenagers give a false picture of their behaviour.
40. Parents are advised to mind their own digital behaviour and set a good example for their kids.
41. Contrary to parents’ belief, kids try hard to leave as few traces as possible on the web.
42. Students’ ability to learn formal writing is unlikely to be affected by texting.
43. Historically, new technologies have always caused great fears among parents.
44. The reading culture was seriously affected by cable television some four decades ago.
45. Teachers say that kids’ writing is too casual, using language characteristic of text messages.

Section C 阅读理解

Passage One

In the history of horse racing, few horses have captured the affection of the British public like Red Rum. Today, three decades after his retirement, he is still one of the best-known and most beloved racehorses of all time.
Red Rum was passed around to several owners before being purchased for Noel Le Mar. The agent who made the purchase was the now-legendary horse trainer Donald “Ginger” McCain.
It wasn’ t apparent at the time, but Red Rum had a serious bone disease in his foot. For many horses (and many trainers. this would mean the end of a racing career before it even began. For Ginger and Red Rum, though, it was just an obstacle to greatness that had to be overcome.
Red Rum’ s true talent came out in steeplechases (障碍赛马). His power, speed and jumping ability carried him to his first Grand National title in 1973. The very next year, Red Rum returned to take his second title. He was the first horse to take successive firsts since Reynoldstown in 1935- 1936. Red Rum’ s spirit and grace had already begun to charm the leagues of Grand National fans.
In the following two years, Red Rum lost out on the title, coming in second both times. When he returned in 1977 to try again, he was largely regarded as past his prime. He was 12 years old and not expected to place highly. He surprised sporting fans around the world when he came in a remarkable 25 lengths ahead of the nearest horse, taking his third Grand National win. To this day, Red Rum’ s third win is known as one of the greatest moments in horse racing history.
Red Rum was headed for the Grand National once again in 1978 but suffered an injury in one of his heels shortly before the race. He was retired soon after, but his public life and fame by no means decreased with the end of his career. Red Rum traveled all over the country for various engagements. He often led pre-race parades at Aintree Racecourse and was a popular guest at charity benefits and public events.

1. **What do we learn from the passage about Red Rum the racehorse?**

A. He captured public affection long before he won national titles.
B. He won enormous fame and love from British people.
C. He became a myth three decades after his retirement.
D. He owed his great success to several well-known horse trainers.

2. **What did the serious bone disease in Red Rum’ s foot mean to himself and his trainer?**

A. It was simply a hindrance they had to get over to excel.
B. It was surely a disadvantage though not considered fatal.
C. It was actually the end of a racing career that had just begun.
D. It was really a major obstacle hard to overcome on their own.

3. **What does the author say Red Rum did with his power, speed and jumping ability?**

A. He won his first Grand National title at 12.
B. He took two firsts successively in 1935-1936.
C. He surprised sporting fans worldwide in 1973.
D. He took three Grand National wins in the 1970s.

4. **What did people generally think of Red Rum when he returned to the racecourse in 1977?**

A. He had already passed the peak of his racing life.
B. He would have no rival in Grand National steeplechases.
C. He had lost his charm with the leagues of Grand National fans.
D. He could be expected to repeat his glory in the prime of his career.

5. **What became of Red Rum after his career ended?**

A. He suffered from severe pain in a heel.
B. He spent almost all his time traveling.
C. He lived on various charity benefits.
D. He remained famous and popular.

Passage Two

People in business often make decisions based on their own personal feelings or instincts. It is quite horrifying to see people being guided by some unknown force. But how wise is it, really, to let your instincts drive your decisions?
In the decision-making process, relying on instincts only makes sense when you have a vast experience to support you. Simply “feeling” that something is right or should be done is highly subjective and can drown you.
On the other hand, there is a more rational approach to making decisions. Data and analysis have long been associated with informed decisions. These reduce the likelihood of errors and increase the chances of success. Big, systematic data is mostly the foundation of most of our decisions, personal and business alike. But with its extreme usability comes a complication: what do you do if you strongly feel something should not be done, even if the data insists that it should?
This seemingly easy question is what drives the need to understand the relationship between instincts and data in the decision-making process. Without making things complicated, the solution to this dilemma is using data and instincts in conjunction to arrive at the best possible decisions.
Instinctive decisions are always backed by previous experiences or information, which acknowledges that instinctive decisions have worked in the past. Decisions are not about making the choice and braving the consequences because you want to blindly trust your instincts. They are about combining your inner wisdom with the knowledge of systematic data to make the best decisions.
Sometimes, rational analysis and data are impractical to be employed in certain situations. Absence of definitive criteria, and time and resource constraints, and novel situations are instances which limit the practicality of data. The only feasible option is to rely on what your instincts tell you. In these situations, instincts can help you make effective and quick decisions.
Combining instinctive and rational analysis produces well-rounded decisions. It reduces the chances of making mistakes, and has increasingly become a favorite approach to decision-making among leaders of today.

1. **What does the author say businesspeople often do?**

A. Rely on instincts in decision-making.
B. Avoid being driven by their own feelings.
C. Draw on a vast wealth of past experience.
D. Strive to make sense of some unknown forces.

2. **What should we take into account in order to make informed decisions?**

A. The likelihood of errors.
B. Systematic data and analysis.
C. The complexity of circumstances.
D. Personal feelings and business strategies.

3. **What should people do in a decision-making process if instincts disagree with data?**

A. Resolve the dilemma with previous experience.
B. Figure out which of the two is more reliable.
C. Combine the two together.
D. Prioritize instincts over data.

4. **What should we do when facing various factors that limit the practicality of data?**

A. Make a rational and systematic analysis.
B. Explore the most feasible options.
C. Resort to our inner wisdom.
D. Apply definitive criteria.

5. **What does it take for decisions to become the best according to the author?**

A. Applying instincts and data in conjunction.
B. Assessing all factors when making a choice.
C. Recalling what has actually worked in the past.
D. Refraining from trusting instincts arbitrarily.

Part IV 翻译 (Translation)

Directions: For this part, you are allowed 30 minutes to translate a passage from Chinese into English. You should write your answer on Answer Sheet 2.

改革开放以来， 中国人的饮食(diet)发生了 显著变化。 过去由于经济落后， 食品种类有限、 数 量不足， 人们仅仅满足于吃得饱。 如今中国经济快速发展， 食品不仅更加丰富多样， 质量也大幅 提高。 随着生活水平不断提升， 人们对饮食的要求越来越高， 更加注重吃得营养健康。 因此， 目 前市场上推出的低脂、 低糖、 有机食品受到人们的普遍欢迎。

听力原文 / Transcripts · 年份 2023 ｜ 月份 12 ｜ 第 三 套 ｜ 时长 125 分钟 ｜ 满分 710（及格 425）

听力原文 / Transcripts

新闻听力原文 / News Report（英文）

College English Test, Band 4, Part 2, Listening Comprehension, Section A, Directions. In this section, you will hear three news reports. At the end of each news report, you will hear two or three questions. Both the news report and the questions will be spoken only once.
After you hear a question, you must choose the best answer from the four choices marked
A, B, C, and D. Then mark the corresponding letter on answer sheet 1 with a single line
through the center.
News reports 1. A police officer in the US stopped a large SUV car that was going very
slowly and drifting across lanes on a highway. He expected to find a driver who
was either very drunk or having a medical emergency. Instead, the officer discovered a five-year-old
boy sat on the edge of the driver's seat. His feet could barely reach the break, and
his head was only just high enough to see out of the windows. The child had taken the keys
to the family car while his teenage sister was napping. He then drove three kilometers
across town before getting on the highway. The boy later told confused officers that he
was planning to travel to California and by a Lamborghini sports car. Although he only
had three dollars in his wallet, at least he was driving in the right direction.
Questions 1 and 2 are based on the news report you have just heard?
Question 1. Why did the police officer stop the SUV car?
Question 2. What did the boy tell the police officers he was planning to do?
News Report 2 Mobile phones have changed the way we live, how we read, work, communicate,
and shop. But we already know this. What we have not yet understood is the way that
Many machines in front of us are changing our skeletons. Possibly altering not just the
way we behave, but even the very shape of our bodies.
New scientific research at the University of the Sunshine Coast in Queensland, Australia,
suggests that young people are developing extra pieces of bone at the backs of their heads.
These pieces of bone are caused by the way people bend their heads when they use the
This shifts weight onto the muscles at the back of the head and causes the bone to grow
in a way that is not normal. This process can be compared to the way the skin heartens
in response to constant rubbing or pressure. The result is a piece of bone like a horn
that sticks out from the head by the neck.
Question 3 and 4 are based on the news report you have just heard.
Question 3.
What does the report say we have not yet understood about mobile phones?
Question 4. What happens to the skin when rubbed or pressed constantly?
New Report 3 A village is going to throw a birthday party for an orange cat's named Wilbur,
who has become famous for making a regular appearance at local shops. Wilbur has his own internet
pages as he approaches his tenth birthday on July 7. Wilbur is both bold and friendly.
He spends most of his time in shops and businesses around the village, he'll just take
himself into any shop anywhere. There was one time when the doctors receptionist came
back and he was sitting on her chair. Among his favourite haunts are a local hairdresser,
two pubs, and the knotting and primary school.
Leslie Harper, who runs one of the pubs, said the cat has been a big hit with their
He's been a regular visitor for most of this year, she told the press association.
He's a very relaxed cat, happy for customers and villagers young and old to come in and
say hello.
She also said he is a cat of expensive tastes, who likes his high priced cat food.
Sarah Godfrey, who is organizing Wilbur's party, told the local newspaper, Wilbur is part
our lives as he is for everyone who lives in the village.
Question 6. What do we learn from the report about the cat?
Question 7. What does the pub owner Leslie Harper say about the cat?

长对话听力原文 / Conversations（英文）

Section B, Directions. In this section you will hear two long conversations. At the end of each conversation, you will hear four questions. Both the conversation and the questions will be spoken only once.
After you hear a question, you must choose the best answer from the four choices, marked
A, B, C, and D. Then, mark the corresponding letter on answer sheet 1 with a single line
through the center. Conversation 1.
So, where do you want to go for lunch?
I don't know. Do you have anything in mind?
What about the sandwich place on Camden Street?
Hmm,no, sorry. I don't feel like sandwiches today. It's a great place, but I think we go there too often.
That's true. Remember that's where we saw Bridget Clark, the famous movie star.
Of course, how could I ever forget? There were crowds of people around her asking for a photo with her.
What about Hamburg, is then? Does that American style diner on the way to the mall?
I like that place. Their chips are great, but their service takes a long time, and I need
to get back by 230 for a conference call. How about trying something new? We could try
Mario's, the new Italian restaurant on the corner. It looks alright. Have you been there?
No, I haven't, but I've noticed that it has great reviews on the internet. It's supposed
to be one of the best Italians in town. I think Jeremy has been there, and said it was amazing.
I'm up for that.
Cool. Have you asked Jeremy if he would like to come with us?
I already have. He says he can't. He has brought his own lunch today, so he will stay in.
I think his wife made him soup.
Poor Jeremy. His wife is a terrible cook. He should throw that soup in the bin and join us.
Questions 8 to 11 are based on the conversation you have just heard.
Question 8. What's are the speakers talking about in this conversation?
Question 9. Where did the speakers see Bridget Clark the famous movie star?
Question 10. Why does the woman say she needs to get back by 230?
Question 11. Why does the woman say Jeremy should throw his soup in the bin?
Conversation 2
Hi there, how are you today? Do you have a reservation with us already?
Good afternoon! Yes! We reserved our rooms yesterday morning on your website for 3 nights, the names Patterson.
Okay, let me have a look. Yes, we have it here. You brought the whole family with you, I see.
Yes, the two kids my wife and I, and her parents too.
Great.
So we have a family room for you and your wife and the kids, and another double room for
your parents and law.
They are right next to each other on the ground floor, since you mentioned in your
message that they have trouble with stairs.
That's wonderful.
My father-in-law has had terrible problems getting up and down stairs since his new operation
last April.
I'm sorry to hear that, and if you need any help to find transportation for the whole family,
we can definitely recommend someone for you.
We were thinking of renting a car, but we will explore all the options available for sure.
So yes, that would be very helpful in comparing prices.
We're also wondering what tours and day trips are available.
We have a bunches of brochures here.
I would recommend getting out on a boat trip.
The kids will love it, and there are so many islands nearby to explore.
There's also a great night market for their into town that has all kinds of food and cool little shops,
selling souvenirs and local jewelry, and clothing made by hand.
That all sounds marvelous.
Now all I need is to photocopy your passports, and then I can get you all checked in and show you to your rooms.
Questions 12 to 15 are based on the conversation you have just heard.
Question 12 Who is the man talking to in the conversation?
Question 13. What do we learn about the man's father-in-law from the conversation?
Question 14. Why does the man say they will explore all the options available?
Question 15. What does the woman suggest the man and his family do close to the end of
the conversation?

听力篇章原文 / Passages（英文）

Section C, directions. In this section you will hear three passages. At the end of each passage you will hear three or four questions. Both the passage and the questions will be spoken only once.
After you hear a question, you must choose the best answer from the four choices marked
A, B, C and D. Then mark the corresponding letter on Ansuchit 1 with a single line through
the center.
Passage 1. Artificial intelligence agents play ever more influential roles in our lives.
They do everything from suggesting new friends to recommending purchases.
They're even beginning to drive our cars.
Another role that they are expected to take over is negotiating on our behalf in commercial transactions or legal disputes.
So, it's important to know whether using an artificial intelligence agent might affect how we negotiate.
Research indicates that it does.
In a new study, participants were told to imagine that they were negotiating for something
important to them, like a house.
Next, they were told either that they would negotiate for themselves, or they would program
an artificial intelligence agent to negotiate for them.
Participants then completed a survey, indicating how tough, deceptive, and pleasant or otherwise
they wanted to be.
or one of their agent to be in the negotiations.
For example, participants could choose to be tough by making an opening demand far greater than what they'd be willing to accept.
They could also choose to express sympathy with their opponent to appear pleasant.
But they could also indicate that day or their agent would strategically express anger toward the opponent to gain advantage.
or they could opt to convey dissatisfaction with the encounter so that the other party
would think they were losing interest. These are both examples of deceptive strategies.
Participants were more willing to employ deceptive strategies when assigned an agent to
negotiate on their behalf. Questions 16 to 18 are based on the passage you have just heard.
Question 16. What does the passive say about artificial intelligence agents?
Question 17. What does the new study want to find out about using an artificial intelligence
agents.
Question 18. What did participants tend to do when assigned an AI agent to negotiate
on their behalf.
Passage 2
New research has studied the effects of a seven week healthy cooking course.
Acid anics measured the program's effect on cooking confidence and self-proceed mental
health.
Researchers also measured participants overall satisfaction around cooking and diet related
behaviours. What were the findings?
Course participants saw significance improvements in general health. They also reported improved
mental health and subjective vitality immediately after the program. These benefits remained
six months after the completion of the course.
What caused these improvements? Researchers have previously found a link between eating more fruits
and vegetables and improved longer-term mental health. This would imply that the participants
in the current study may have felt better due to improved diet. However, the study showed
participants mental health improved even if their reported diets did not change after
completing the program. Also, the mental health benefits were equal among participants who
are overweight or obese and those in a healthy weight range. This suggests a link between
cooking confidence and satisfaction around cooking and mental health benefits.
Who benefits most from learning to cook? Gender plays a part. At the start of the program,
77% of female participants were confident about cooking, but just 23% of males were confident.
At the end of the program, cooking confidence and skills were equal across both counterparts.
This changing confidence could lead to a gender balance in home cooking.
This in turn could reduce consumption of unhealthy high calorie processed meals.
Question 19. Question 19. Question 19. What do we learn about the benefits the participants gained from the healthy cooking course?
Question 20. What do the new research findings suggest about mental health benefits?
Question 21. What plays a role in determining who benefits most from learning to cook?
Passage 3 What is personal space?
We often think of it as an invisible bubble of space surrounding us that others can't
enter without causing discomfort.
Research shows, however, that we actually have bubbles of different sizes.
Each of these bubbles applies to a different set of people.
The smallest zone, called intimate space, extends outward from our bodies, 18 inches in every direction.
Only family, pets, and one's closest friends may enter it.
Amir acquaintance entering our intimate space makes us uncomfortable.
Next is the bubble called personal space, extending from 1.5 feet to 4 feet away.
Friends and acquaintances can comfortably occupy this zone, especially during informal conversations,
but strangers are forbidden.
Extending from 4 to 12 feet away from us is social space.
Here people feel comfortable conducting routine social interactions with new acquaintances
or total strangers.
Those are the average sizes of Americans' personal bubbles, anyway.
It is important to keep in mind that personal space varies depending on culture and context.
Furthermore, there are significant individual differences. As we all know, cultural or individual
differences in personal bubble diameters are all too often the cause of discomfort.
How do these personal bubbles arise? According to research, we begin to develop our individual
sense of personal space around age 3 or 4. The sizes of our bubbles are fixed by our
These bubbles are constructed and monitored by the brain region involved in fear.
Questions 22-25 are based on the passage you have just heard.
Question 22.
What does research show about our personal space?
Question 23 What happens if a mere acquaintance enters our intimate space?
Question 24. Where the people feel comfortable interacting with new acquaintances or
strangers.
Question 25 When are the sizes of our bubbles fixed?
That's the end of listening comprehension.
