2022年09月四级真题第2套

原卷 / Question Paper · 年份 2022 | 月份 9 | 第 二 套 | 时长 125 分钟 | 满分 710（及格 425）

Part I 写作 (Writing)

Directions: Suppose your class has just finished celebrating the Teachers，Day. You are now to write a report to the university newspaper on the celebration activities organized by your class. You will have 30 minutes to write the report. You should write at least 120 words but no more than 180 words.

建议时间：30 分钟 | 字数：120-180 | 分值：15

作答区

Part II 听力理解 (Listening Comprehension)

Section A news

短新闻

听力音频：audio/SectionA.mp3（见离线包 papers 目录对应 audio 文件夹）

1. **What do we learn from the news report about the study?**
   A. It examines the effect of cholesterol on people's health.
   B. Its participants all had high blood cholesterol levels.
   C. It questions the benefits of a vegetarian protein diet.
   D. Its finding came as a surprise to the researchers.
2. **What did the researchers acknowledge?**
   A. They do not know all the effects of eating meat.
   B. Red meat itself does not cause heart diseases.
   C. White meat may be healthier than red meat.
   D. Vegetarian protein may be easier to absorb.
3. **What does the news report say about the accident at the crossing of high street and Milton?**
   A. It may have been due to the lorry driver's drunk driving
   B. It may affect the local supply of turkeys for Christmas.
   C. It interrupted traffic for several hours running.
   D. It was caused by a lorry running into a trailer
4. **What do we learn about the crossing on high street?**
   A. It has been the scene of several fatal accidents recently.
   B. It is the spot that causes the local police a lot of worry.
   C. It has witnessed several traffic accidents this year.
   D. It is a location frequented by local traffic police
5. **What is Bangalore Airport trying to do about the helicopter taxi service?**
   A. Get approval to add more routes.
   B. Attract more international tourists.
   C. Advertise it through a mobile app
   D. Make it affordable to common folk.
6. **What do we learn from the news report about the helicopter taxi ride?**
   A. It costs more than twice as much as a car ride.
   B. It is gaining popularity among ordinary Indians.
   C. It symbolizes India's advancement in high-tech.
   D. It can get any where in the city within 15 minutes.
7. **Who are the targeted customers of the helicopter taxi service?**
   A. International tourists.
   B. High-class travelers.
   C. Prominent superstars.
   D. Customers in a hurry.

Section B conversations

长对话

听力音频：audio/SectionB.mp3（见离线包 papers 目录对应 audio 文件夹）

1. **What does the woman plan to do for the weekend?**
   A. Treat her friends in a bar.
   B. Take a trip to Washington.
   C. Make some cheese.
   D. Throw a party.
2. **What does the man suggest the woman do?**
   A. Spend no more than 30 dollars.
   B. Buy different kinds of cheese.
   C. Help him prepare t he barbecue.
   D. Find out different people's tastes.
3. **What does the man say about Spanish goat cheese?**
   A. It is the best kind of hard cheese.
   B. It is the most popular in Spain.
   C. It is more delicious than honey.
   D. It is a good choice for children.
4. **What is the woman going to do at the end of the conversation?**
   A. Buy what the man recommended.
   B. Have a taste of both of the cheeses.
   C. Choose one o f the two types of cheese.
   D. Ask the man to cut the cheese into slices.
5. **What does the woman say about using e-text books?**
   A. New teachers and staff have to be recruited.
   B. It might take some time for students to adapt.
   C. It involves buying lots of tablets and software.
   D. The software has to be constantly upgraded.
6. **According to the man, how can the use of tablets benefit students?**
   A. It can greatly improve their learning efficiency.
   B. It can help them to interact more with teachers.
   C. It can save their trouble of carrying printed books.
   D. It can develop their skills in using electronic devices.
7. **What does the woman say about students using tablets?**
   A. They may have trouble comprehending texts.
   B. They may encounter technological problems.
   C. They may pay less respect to teachers.
   D. They may get distracted more easily.
8. **What does the woman say about making electronic readers?**
   A. It generates a great deal of electronic garbage.
   B. It does a lot of damage to the environment.
   C. It emits huge amounts of harmful radiation.
   D. It accelerates the exhaustion of rare minerals.

Section C passages

听力篇章

听力音频：audio/SectionC.mp3（见离线包 papers 目录对应 audio 文件夹）

1. **What does the passage say we tend to do every day?**
   A. Communicate with our coworkers.
   B. Encounter people in different places.
   C. Judge people based on our first impressions.
   D. Engage in a variety of psychological activities.
2. **What do we learn about person perception from this passage?**
   A. It is an objective evaluation of a person's character.
   B. It is a mental process influenced by many factors.
   C. It contributes to the formation of personal traits.
   D. It varies greatly among different social groups.
3. **What is the problem with using social categorization in person perception?**
   A. It can lead to incorrect judgments.
   B. It can cause mistrust among people.
   C. It can result in instant losses.
   D. It can give rise to gender bias.
4. **What does the new study suggest about young people today and those from the previous generation?**
   A. Both groups spend a lot of time on mobile devices.
   B. Both groups attach importance to social connections.
   C. They are equally competent in using new technology.
   D. They are similar in terms of social skills.
5. **What did the city find about children who access social networking sites many times a day?**
   A. Their social skills were negatively affected.
   B. Their school performance was slightly lower.
   C. Their emotions were much harder to regulate.
   D. Their relations with peers were badly strained.
6. **What is adults worry about technological change?**
   A. It may pose a threat to their children's safety.
   B. It may affect society's traditional values.
   C. It may hurt their relations with children.
   D. It may change their children's ethical values.
7. **What does the speaker say about inspiration from consuming others ideas and success stories?**
   A. It is motivating.
   B. It is passive.
   C. It is incredible.
   D. It is impracticable.
8. **What do we learn from the passage about active inspiration?**
   A. It results in short-term excitement.
   B. It helps us avoid making mistakes.
   C. It breeds long-term passion and enthusiasm.
   D. It is bound to help us achieve greater success.
9. **What does the passage say passive inspiration can do?**
   A. Drive us forward.
   B. Bring us power.
   C. Spur us to action.
   D. Give us ideas.
10. **Where does the best inspiration come from, according to the passage?**
    A. Listening to success stories.
    B. Applying ideas to one's life.
    C. Following the advice of experts.
    D. Consuming the world around us.

Part III 阅读理解 (Reading Comprehension)

Section A 选词填空

Word Bank（词库）

A) accommodate
B) accordingly
C) acquiring
D) bothered
E) fortune
F) fulfilling
G) identify
H) literally
I) opposite
J) profession
K) purpose
L) ranked
M) released
N) similarly
O) wrong

Public perception of success in the U.S. might be totally misguided.

While 92% of people believe others care most about fame and **__26__**, fewer than 10% factor those qualities into their own success. This is according to the newly **__27__** study by Harvard Graduate School of Education professor Todd Smith. Smith says he was **__28__** by how past studies on success “assumed what people will care about." In this study, his team “went the **__29__** direction” by spending years carrying out individual

interviews and group surveys to see what people really talk about when they talk about success.

As a scientist, Smith **__30__** studied individuality for a living, and even he was surprised to find younger respondents cared more about having a **__31__** in life. Those between the ages of 18 and 34 prioritized it most, and that prioritization dropped off as respondents ages went up. Perhaps this is because older people had fewer options when they were starting their careers, at a time when values focused more on stable incomes than **__32__** personal missions.

Other trends included an emphasis on the importance of parenting. Being a parent **__33__** very high across the priorities of all study participants. Ultimately, Smith hopes institutions will take note of these insights **__34__**.

Higher education institutions tend to focus on preparing students for high-paying jobs. For such institutions, from universities to workplaces, to better **__35__** people in the U.S., they'll need to understand “what the American public highly prioritizes,” Smith says.

空格题号：26、27、28、29、30、31、32、33、34、35

Section B 段落匹配

Directions: 阅读下列段落，为每个句子选出所对应的段落。每个段落可能被选一次、多次或不被选择。

A At whatever grade level teachers find themselves, from kindergarten to the final class at medical or law school, few moments stir the emotions as deeply as when former students reappear years and often decades later with an update on where their journey has taken them and what resiliencies (韧性)have been the pavement on which they've traveled.

B So it was when a recent letter came from Kelli Harding, a student 21 years ago in my Peace Studies summer course in Washington. The weekly tuition-free class, in a roomy space that Ralph Nader and his Public Citizen nonprofit group provided, was discussion-based and required no useless homework or exams. Just come in and figure out how to increase peace and decrease violence. And do it today, tomorrow is too late. The course attracted mostly congressional interns (实习 生)，with a few exceptions like Kelli who was in Washington as an AmeriCorps volunteer.

C Her year-long service included comforting AIDs patients at a free health clinic and delivering meals to the homebound. It was a world apart from her undergraduate days at the University of California- Berkeley majoring in political science. The Washington experience, which Kelli would later call "transformative," was the fuel that carried her into medicine to earn a master's degree in public health from Columbia University and a medical degree from the University of Rochester, and almost two decades of practice as an emergency-room psychiatrist (精不申科医生)at New York-Presbyterian Hospital and a clinical professor of psychiatry at Columbia University Irving Medical Center.

D Kelli's letter, a literate update on both her personal and professional life, touched my heart, and especially so when saying that two decades later she still has the course text, "Solutions to Violence,“ and that “it remains one of my favorite possessions." She lives in Lower Manhattan with her husband, Padraic, whom she met on a flight to London, and their three boys.

E If Kelli stands out, it's because she is also a gifted writer. Last month, Atria Books published her book The Rabbit Effect'. Live Longer, Happier, and Healthier with the Groundbreaking Science of Kindness.

F With a blending of free-flowing confessional prose and scholarly research found in 461 notes, Kelli met my expectations that her ideas and ideals would be sound and singular.

“Despite our scientific progresss,"she writes,ccAmericans are remarkably unhealthy. In 2016, the United States ranked forty-third in the world for life expectancy.... It is also by far the world's most expensive place to get sick.”

G Enter the rabbits-not those running around in our woodlands but ones serving in two month-long medical experiments to test the effects of eating a high-fat diet and the connections between cholesterol and heart disease. With similar diets, the expectations were that all the rabbits would have similar cloggings of their arteries （动脉堵塞）.Yet one group had 60% fewer of them.

H The reason? Instead of receiving the standard care given to lab animals, the 60% group was watched over by a newcomer to the lab who, Kelli writes, "handled the animals differently. When she fed her rabbits she talked to them and petted them. She didn't just pass out food, she gave them love.... The studies indicate something is missing in the traditional biomedical model. It wasn't diet or genetics that made a difference in which rabbits got sick and which stayed healthy. It was kindness."

I Amid the political noise about Obamacare, Medicare, Medicaid, health insurance and thieving pharmaceutical （医 药 的 ）companies, Kelli Harding stands apart from the crowd calling for quick fixes, the simpler the better. She has walked too many miles in the halls of hospitals visiting too many far-gone patients and seeing too many medical mistakes to go along with conventional thinking.

J “The rabbit effect,” she explains, means that “when it comes to our health, we've been missing some crucial pieces: hidden factors behind what really makes us healthy. Factors like love, friendship, and dignity. The designs of our neighborhoods, schools, and workplaces. There's a social dimension to health that we've completely overlooked in our efforts to find the best and most cutting-edge medical care.... Ultimately, what affects our health in the most meaningful ways has more to do with how we treat one another, how we live, and how we think about what it means to be human than with anything that happens in the doctor's office.”

K In more than a few passages, she relates the stories of men and women who came up against assembly- line medicine where patients were treated mostly as pieces of flesh. “Clinically,she writes,it's common to see two patients with the same condition, such as recovering from a heart attack, have two very different courses based on seemingly irrelevant factors, such as their family relationships or their educational levels. In my practice, the sickest people I see often share similar backgrounds: loneliness, abuse, poverty, or discrimination. For them, the medical model isn't enough. It's like fixing up an airplane engine and ignoring that the pilot is on his third drink at the bar and a massive storm is overhead.... To properly care for patients, we also need to care about the lives of the people getting the care."

L Kelli wastes no time taking potshots at （随意全匕评）the medical establishment and its body-centered biomedicine methods. Instead, she remains positive, holding up for praise one of her medical school professors, George Engel, “who always noticed not just a patient's physical condition but little details about her life, such as if she had family pictures up in her hospital room or flowers delivered. He was the kind of trusted doctor you'd feel relieved to see and welcome into the room with a sick family member.

He'd sit down to talk with the patient not just about medical problems, but about her life and priorities. He built a large consultation service to address the holistic （整体的） needs of hospitalized patients, including psychological and social factors.

M It's a guess how many George Engels in their white jackets are at work these days and another speculation on the number of Kelli Hardings the nation is blessed with. May the totals be large and getting larger.

待匹配句子

36. Kelli Harding also distinguishes herself by her literary talent.

37. Kelli Harding doesn't think America's medical model is sufficient for patients who need help most.

38. Kelli Harding differs from those seeking quick and simple solutions to America's medical problems.

39. Kelli Harding was a participant in a summer course the author taught.

40. According to Kelli Harding, scientific advances have not made Americans healthier, nor prolonged their life.

41. The author was deeply moved by what Kelli Harding wrote about her current life.

42. George Engel, in treating his patients, not only looks into their symptoms but also into things like the emotional support they receive.

43. According to Kelli Harding, rabbits' health had more to do with humans' kindness to them than their diet or genetics.

44. What Kelli Harding went through in Washington changed her life.

45. A social aspect to health has not been taken into account in trying to provide the best medical care.

Section C 阅读理解

Passage One

Academic dishonesty is nothing new. As long as there have been homework assignments and tests, there have been cheaters. The way that cheating looks has changed over time, though, particularly now that technology has made it easier than ever. A study by the Josephson Institute of Ethics interviewed 23,000 high school students and asked them a variety of questions about academic ethics. Of the teens surveyed, 51 percent said that they had knowingly cheated at some point on an exam but that they did not feel uneasy about the behaviour. A Common Sense Media survey found that 35 -percent of students had cheated via smartphone, though the parents surveyed in that particular study did not believe their kids had ever cheated. In many cases, students did not realize that strategies like looking up answers on a smartphone were actually cheating at all.

In today's classrooms, students who cheat are rarely caught. There are no formulas written on the insides of hands or students looking across the aisle, or whispering answers to their classmates. Today's students use smartphones, tablets or even in-class computers to aid their cheating attempts and leave no trace of their crimes. Since cheating through technology is not listed specifically as being against the rules in many school policies, students do not view the actions unethical.

The technology is being adopted so quickly that school districts cannot adequately keep up with cheating policies, or even awareness campaigns that alert students to the problem with using technology to find answers in a certain way. From a young age, students learn that answers exist conveniently at their fingertips through search engines and expert websites.

Schools must develop anti-cheating policies that include technology and these policies must be updated consistently. Teachers must stay on guard when it comes to what their students are doing in classrooms and how technology could be playing a negative role in the learning process. Parents must also talk to their kids about the appropriate ways to find academic answers and alert them to unethical behaviours that may seem innocent in their own eyes.

1. **What do we learn from the study by the Josephson Institute of Ethics?**
   A. Over half of the students interviewed were unaware they were cheating.
   B. Cheating was becoming a way of life for a majority of high school teens.
   C. More than half of the interviewees felt no sense of guilt over cheating.
   D. Cheating was getting more and more difficult for high school students.
2. **What did the Common Sense Media survey reveal?**
   A. Most parents tended to overprotect their children.
   B. Many students committed cheating unknowingly.
   C. Students were in urgent need of ethical education.
   D. Parents and kids had conflicting ideas over cheating.
3. **Why do students rarely get caught cheating nowadays?**
   A. They copy formulas on their palms.
   B. They help each other to cover up their acts.
   C. They keep changing their ways of cheating.
   D. They make use of modem technology.
4. **What does the author think schools should do to tackle cheating?**
   A. Bring policies against cheating up to date.
   B. Reform their exam methods constantly.
   C. Take advantage of the latest technologies.
   D. Alert parents to their children's behaviour
5. **What does the author suggest teachers do in the classroom?**
   A. Prevent students from overusing electronic devices.
   B. Develop more effective anti-cheating strategies.
   C. Find more ways to curb students'unethical acts.
   D. Guard against students' misuse of technology

Passage Two

Remote work is about more than just working from home——it means working differently. Organizations should reconsider the appropriateness of their performance evaluation procedures in light of the shift to remote work. This requires a fundamental rethinking of what organizations expect from employees and what companies would look for in a model employee in a remote work context.

It is likely that the “first to arrive and last to leave ” mentality is no longer relevant, but should be replaced by a regard for the quality of an employee's contribution to the organization. This means that work should be measured in terms of the quality of the work,not just the quality of the process. As remote work is largely unobservable to supervisors,employers need to think about how they can objectively measure the quality of work in a way that is consistent for employees of similar rank.

Focusing on output alone can have unintended consequences. Employers should think instead about the values and soft skills they want to emphasize in a remote work environment. Qualities like flexibility and the ability to work under minimal supervision might become critical. Much has been written about the importance of timely feedback. In the context of a global pandemic (大流行病)，firms may want to provide additional support to employees by providing more frequent communication. This allows managers to both keep an eye on struggling employees and provide ongoing feedback on how employees are adapting to their new work environment.

Compensation also needs to be revisited. The purpose of performance evaluation is ultimately to determine how to reward employees for their work. This means that pay structures need to adapt to the reality of working from home. However, organizations also need to be honest with employees about the financial impact of COVID-19.

For organizations that have struggled to keep the lights on due to the pandemic, this might mean thinking of non-financial ways to reward employees, like unpaid time off or flexible work schedules. Employers can also consider how to bundle different types of compensation to help employees cope with their unique situations.

1. **What does the author say companies should do in the context of remote work?**
   A. Reform performance evaluation.
   B. Rethink the organizational fundamentals.
   C. Reexamine its effects on employees'behaviors.
   D. Reflect on its differences from working in the office.
2. **What should be prioritized in assessing employees'remote work?**
   A. The quantity of their output.
   B. The length of their work time.
   C. The quality of their contribution.
   D. The flexibility of their work schedules.
3. **What quality in the employees would be of great importance in a remote work context?**
   A. The ability to produce quality work.
   B. The ability to maximize work efficiency.
   C. The ability to finish tasks in a timely manner.
   D. The ability to work with the least supervision.
4. **Why is it important for firms to provide timely feedback during the pandemic?**
   A. To evaluate their employees of similar rank in a consistent way.
   B. To keep a watchful eye on those employees who perform poorly.
   C. To help employees in need adapt to the new work environment.
   D. To maintain connections with their employees away from office.
5. **What is the author's suggestion to employers who experience the financial impact of the pandemic?**
   A. Urging their employees to adapt to the new situation.
   B. Rewarding their employees in unconventional ways.
   C. Identifying employees who make little contribution.
   D. Allowing their employees to look for part-time jobs.

Part IV 翻译 (Translation)

Directions: For this part, you are allowed 30 minutes to translate a passage from Chinese into English. You should write your answer on Answer Sheet 2.

按照中国民间的传统习俗，春节期间长辈通常会给孩子发红包，俗称发压 岁 钱 (lucky money),以表达对孩子的祝福，祝他们好运。如今，红包不仅是给孩子的礼物，而且经常也是给长辈或亲朋好友的礼物。近年来，随着微信用户数量的增加，微信红包变得愈加流行。欢度春节时，人们经常互发微信红包表达问候。这无疑是一种与远方亲友联系的便捷方式。

2022年09月四级真题第2套

听力原文 / Transcripts · 年份 2022 | 月份 9 | 第 二 套 | 时长 125 分钟 | 满分 710（及格 425）

听力原文 / Transcripts

新闻听力原文 / News Report（英文）

College English Test, FAND 4, Part 2, Listening Comprehension, Section A, Directions. In this section, you will hear three news reports. At the end of each news report, you will hear two or three questions. Both the news report and the questions will be spoken only once.
After you hear a question, you must choose the best answer from the four choices marked
A, B, C, and D. Then mark the corresponding letter on answer sheet 1 with a single line
through the center.
News report 1. White meat, such as chicken, may raise blood cholesterol levels as much as
red meat does. This finding surprised researchers who admitted they didn't expect that
Even white meat would lead to higher blood cholesterol levels.
In the study, researchers looked at 113 healthy people, the participants ate three different
diets.
These were a red meat diet, which is primarily beef, a white meat diet, which is mostly
chicken and turkey, and the vegetarian protein diet.
Each diet period was four weeks.
Between the diet periods, participants had a break, during which they ate their regular
foods. In addition, participants had blood tests at the start and finish of each new diet.
The results showed that white and red meat diets had the same effects on blood cholesterol
levels. Further, both diets increased blood cholesterol levels compared with the diet
built on vegetarian protein sources. The team acknowledged that it is possible that white
is better for our health than red meat, despite their findings. This is because other effects
of red meat consumption could contribute to heart disease independent of cholesterol. Their
main recommendations are that people eat less of both kinds of meat and more vegetarian protein.
Questions 1 and 2 are based on the news report you have just heard.
Question 1. What do we learn from the news report about the study?
Question 2. What did the researchers acknowledge?
New Report 2.
At around half past nine this morning, a trailer attached to a lorry turned over at the
crossing of high street and Milton.
Hundreds of frozen turkeys were spilled all over the road.
It is reported that nobody was hurt in the incident, but police said it may affect traffic
and Christmas dinners.
With just one week to go before Christmas, there are worries that local supermarket supplies
of this holiday favorite may be affected.
A police spokeswoman said that officers were currently in attendance at the scene.
She stated that the driver of the Lori had been arrested on suspicion of dangerous
driving.
The crossing on high street is a well-known accident black spot.
This year alone, there have been seven traffic accidents at this location.
Thankfully, none of these accidents have resulted in serious injury.
Questions 3 and 4 are based on the news report you have just heard.
Question 3, what does the news report say about the accident at the crossing of high street and Milton?
Question 4.
What do we learn about the crossing on high street?
Use Report 3.
India have launched its helicopter taxi service on Monday.
Promising the ferry customers, the 40 miles between Bangalore's Electronic City Tech Hub,
and the International Airport Terminal in 15 minutes.
Customers can book their helicopter ride through a mobile app.
The service which planes to be the first of its kind in India offers only one route,
but Bengalu airport will add more once it gets approval.
Helicopter taxi is not an affordable option for many travelers.
A car ride for the same journey costs less than half as much.
But Bingo Lourer Airport says it is a competitive alternative to a car ride for tech executives
in a hurry.
A large number of high-class travelers, including CEOs, have to spend more than three hours
by road to get there.
And that is a loss of time.
A Bingo Lourer Airport spokesperson said,
This is not a low-cost option, but it is an option, she added.
The helicopters buried around eight customers to the airport on their first day.
The company that owns and operates the service is called Thumbi Aviation.
It previously specialized in private charter flights for government officials.
Questions 5-7 are based on the news report you have just heard.
Question 5. What is Bangalore Airport trying to do about the helicopter taxi service?
Question 6. What do we learn from the news report about the helicopter taxi ride?
Question 7. Who are the targeted customers of the helicopter taxi service?

长对话听力原文 / Conversations（英文）

Section B, directions. In this section you will hear two long conversations. At the end of each conversation, you will hear four questions. Both the conversation and the questions will be spoken only once.
After you hear a question, you must choose the best answer, from the four choices marked
A, B, C, and D. Then mark the corresponding letter on answer sheet 1 with a single line
through the center.
Conversation 1
Hi, I wish to buy some cheese for a barbecue this weekend.
What kind would you like?
Sorry, I don't know much about cheese.
What type do you think would be suitable for a barbecue?
That's easy. For a barbecue, you could have any cheese you want.
I imagine there will be different foods, and people will just help themselves and eat at their own pace, right?
Yes, exactly. It will be very casual. We will just be a small group of friends gathering together at Washington Park.
There will be around 20 of us, including children.
Great. So you could have different types of cheese. How much would you like to spend?
Not very much. Let's say $30.
I would suggest having at least one soft cheese and one hard cheese. That will offer you a good variety to suit different people's tastes.
That sounds good. What's the difference between a soft cheese and a hard cheese?
Well, it depends. But generally speaking, soft cheeses are creamy and go well with sweet
things like honey and jam. I would suggest something like this Spanish goat cheese. It's
only $15, a very good price. You can spread it on bread with a knife and then add a tiny
bit of honey on top. It's delicious. Children love it. Okay, great. What about a hard cheese?
Yes, for hard cheese, I would recommend this Italian one here. It has a very strong smell and a dry
flavor. You can cut it into thin slices and eat it on its own. It's $16. Okay, I'll take both. Thank
for your help.
Questions 8 to 11 are based on the conversation you have just heard.
Question 8 What does the woman plan to do for the weekend?
Question 9. What does the man suggest the woman do?
Question 10. What does the man say about Spanish goat cheese?
Question 11. What is the woman going to do at the end of the conversation?
Conversation 2 Our school is replacing printed textbooks with E textbooks next semester.
I can't wait.
Really? What about the cost? Not only buying all those tablets, but the software, an electronic
infrastructure that goes with it. Not to mention retraining all the teachers and administration
staff.
Sure, the initial expenditure will be high, but much lower afterwards.
The size that tablet prices continue to drop and are becoming increasingly affordable.
Anyway, tablets help students learn up to 80% faster.
Not necessarily.
Tablets have too many distractions.
Students may pay attention to apps, games, and websites.
Instead of their teachers, in fact, research suggests that people who read printed text
comprehend more, remember more, and learn 30% more than those who read digital text.
Yes, but tablets contain many technological features that are not found in printed textbooks.
Think about it.
students are able to highlight and edit text, write notes, and search for information
much more quickly than they can with printed textbooks. And what about all those trees
that are cut down to make printed books?
Actually, manufacturing tablets is environmentally destructive and dangerous to human health.
The health impacts from making one electronic reader are 70 times greater than those from making a single printed book.
A lot of minerals are extracted from the earth to make electronic readers.
It does far more damage to the environment.
Yes, but the software for electronic readers can be updated instantly without the need for buying a whole lot of new books.
That's better for the environment.
But the core curriculum doesn't change that much.
Printed textbooks that are not brand new still contain the basic relevant information
of core subjects.
Well, I'm looking forward to the change.
I'll stick with my printed books.
Questions 12-15 are based on the conversation you have just heard.
Question 12.
What does the woman say about using e-text books?
Question 13.
According to the man, how can the use of tablets benefit students?
Question 14. What does the woman say about students using tablets?
Question 15. What does the woman say about making electronic?

听力篇章原文 / Passages（英文）

Section C, directions. In this section, you will hear three passages. At the end of each passage, you will hear three or four questions.
Both the passage and the questions will be spoken only once. After you hear a question, you must choose the best answer from the four choices marked A, E, C, and D.
Then mark the corresponding matter on answer sheet 1 with the single line through the center.
Passage 1. In social psychology, the term person perception refers to the mental processes that we use to form impressions of other people.
It includes not just how we form these impressions, but the conclusions we make about other people based on our impressions.
Consider how often you make this kind of judgment every day.
When you meet with a new coworker, you immediately begin to develop an initial impression
of this person.
When you visit the grocery store, you might draw conclusions about the cashier who checks
you out.
Obviously, person perception is a very subjective process that can be affected by a number
of variables, including the characteristics of the person you are observing, the context
of the situation, your own personal traits, and your past experiences.
One of the techniques we use in person perception is social categorization. In this process,
we mentally categorize people into different groups, based on common characteristics.
problems with this technique include the fact that it can lead to errors and prejudice.
Imagine that you are getting on a bus. There are only two seats available. One is next
to a small elderly woman. The other is next to a muscular, fierce looking man. You sit next
to the elderly woman who unfortunately turns out to be quite skilled at picking pockets.
Because of social categorization, you immediately judge the woman as harmless and the man
as threatening, leading to the loss of your wallet.
Questions 16-18 are based on the passage you have just heard.
Question 16.
What does the passage say we tend to do every day?
Question 17. What do we learn about person perception from this passage?
Question 18. What is the problem with using social categorization in person perception?
Passage 2 Despite smartphones and social media, young people today are as socially competent
as those from the previous generation. At least this is what a new study suggests. For
The study researchers compared teacher and parent evaluations of American children who started kindergarten in 1998 with those who began school in 2010.
The former group entered kindergarten when mobile phones were luxuries.
The latter group started school when mobile devices were widespread.
Results showed both groups of children were rated similarly on important social skills.
He's included the ability to form and maintain friendships and get along with people who are different.
They were also rated similarly on self-control, such as the ability to regulate their temper.
In virtually every comparison made, ratings of social skills either remain constant or improved for the children born later.
There was one exception. Social skills were slightly lower for children who access online
games and social networking sites many times a day. Adults are worried when technological
change starts to undermine traditional relationships, particularly the parent-child relationship.
The introduction of telephones, automobiles, and radio all led to moral panic among adults
of the time because the technology allowed children to enjoy more freedom.
Fears over screen-based technology represent the most recent panic in response to technological change.
But overall, the study found little evidence that time spent on screens was hurting social skills for most children.
Questions 19-21 are based on the passage you have just heard?
Question 19. What does the new study suggest about young people today and those from the previous generation?
Question 20. What did the study find about children who access social networking sites many times a day?
Question 21. What is adults worry about technological change?
Passage 3. It's easy to spend all day searching for inspiration. You can find incredible
videos, articles, and news stories about the success of others. The problem is that consuming
the success and ideas of others is passive inspiration. Every time you read an article or listen
to an interview, you're practicing passive inspiration. You might learn something, but you don't
actually have to do anything. Hearing about other people's success isn't the same as creating
your own. Instead, it is through the process of active inspiration, the act of creating things,
Applying new ideas to our goals and making mistakes
that we discover who we are and what is important to us.
Furthermore, active inspiration is what results in long-term passion and enthusiasm.
Watching someone else's success might leave you feeling excited for a few minutes.
However, taking action and applying a new idea to your life will inspire you more than anything someone else could say.
Learning and listening can help you think about things in a different way, but creating,
producing, and experimenting is what drives you forward. Passive inspiration can give you ideas,
but active inspiration will give you power. Too often we spend our lives consuming the world
around us instead of creating it. And what matters is the power your actions have to inspire
you. The best inspiration comes from the application of ideas, not the consumption of them.
Questions 22 to 25 are based on the passage you have just heard.
Question 22. What does the speaker say about inspiration from consuming others ideas and success stories?
Question 23. What do we learn from the passage about active inspiration?
Question 24. What does the passage say passive inspiration can do?
Question 25. Where does the best inspiration come from, according to the passage?
That's the end of listening comprehension.
