2021年06月四级真题第3套

原卷 / Question Paper · 年份 2021 | 月份 6 | 第 三 套 | 时长 125 分钟 | 满分 710（及格 425）

Part I 写作 (Writing)

Directions: For this part, you are allowed 30 minutes to write an essay titled “Do violent video games lead to violence?” The statement given below is for your reference. You should write at least 120 words but no more than 180 words. A growing body of research finds that violent video games can make kids act aggressively in their real world relationships, causing an increase in violence.

建议时间：30 分钟 | 字数：120-180 | 分值：15

Part II 听力理解 (Listening Comprehension)

Section A news

短新闻

听力音频：audio/SectionA.mp3（见离线包 papers 目录对应 audio 文件夹）

1. **What did the old man attempt to do?**
   - A. See the Pope
   - B. Go to Newcastle
   - C. Travel to Germany
   - D. Tour an Italian city
2. **What finally happened to the old man?**
   - A. He was taken to hospital in an ambulance.
   - B. His car hit a sign and was badly damaged.
   - C. His GPS system went out of order.
   - D. He ended up in the wrong place.
3. **What do we learn from the news report?**
   - A. Scotland will reach the national target in carbon emissions reduction ahead of schedule.
   - B. Glasgow City Council has made a deal with ScottishPower on carbon emissions.
   - C. Glasgow has pledged to take the lead in reducing carbon emissions in the UK.
   - D. First Minister Nicola Sturgeon urged ScottishPower to reduce carbon emissions.
4. **What did Scottish powers chief executive say ahead of the all-energy conference?**
   - A. Glasgow needs to invest in new technologies to reach its goal.
   - B. Glasgow is going to explore new sources of renewable energy.
   - C. Stricter regulation is needed in transforming Glasgow s economy.
   - D. It’s necessary to create more low-emission zones as soon as possible.
5. **What do we learn from the news report about the Japanese IT firm?**
   - A. It donates money to overpopulated animal shelters.
   - B. It permits employees to bring cats into their office.
   - C. It gives 5,000 yen to employees who keep pet cats.
   - D. It allows workers to do whatever their hearts desire.
6. **What does Fukuda encourage his employees to do?**
   - A. Keep cats off the street.
   - B. Rescue homeless cats.
   - C. Volunteer to help in animal shelters.
   - D. Contribute to a fund for cat protection.
7. **What does the news reports say about the firm’s policy?**
   - A. It has contributed tremendously to the firm’s fame.
   - B. It has helped a lot to improve animals’ well-being.
   - C. It has led some other companies to follow suit.
   - D. It has resulted in damage to office equipment.

Section B conversations

长对话

听力音频：audio/SectionB.mp3（见离线包 papers 目录对应 audio 文件夹）

1. **What does the man want to do?**
   - A. Find out where Jimmy is.
   - B. Borrow money from Jimmy.
   - C. Make friends with Jimmy.
   - D. Ask Jimmy what is to be done.
2. **What do we learn about the man who came to see the woman yesterday?**
   - A. He was unsure what kind of fellow Jimmy was.
   - B. He was working on a study project with Jimmy.
   - C. He wanted to make a sincere apology to Jimmy.
   - D. He wanted to invite her to join in a study project.
3. **What did Jimmy say happened to him one day?**
   - A. He got a ticket for speeding.
   - B. He got his car badly damaged.
   - C. He was involved in a traffic accident.
   - D. He had an operation for his injury.
4. **Why did Jimmy borrow money according to the man?**
   - A. He needed to make some donation to charity.
   - B. He found the 60 pounds in his pocket missing.
   - C. He wanted to buy a gift for his mother’s birthday.
   - D. He wanted to conceal something from his parents.
5. **What did the woman want to ask Max about?**
   - A. Shopping delivery.
   - B. Shopping online.
   - C. Where he goes shopping.
   - D. How often he does shopping.
6. **What does the man think is a problem with shopping and supermarkets?**
   - A. Searching in the aisles.
   - B. Dealing with the traffic.
   - C. Driving too long a distance.
   - D. Getting one’s car parked.
7. **What is the woman's concern about shopping online?**
   - A. The after-sales service.
   - B. The replacement policy.
   - C. The quality of food products.
   - D. The damage to the packaging.
8. **What does the man find about shopping online?**
   - A. It saves money.
   - B. It offers more choice.
   - C. It increases the joy of shopping.
   - D. It is less time-consuming.

Section C passages

听力篇章

听力音频：audio/SectionC.mp3（见离线包 papers 目录对应 audio 文件夹）

1. **What did a recent study find about some British children?**
   - A. They have little talent for learning math.
   - B. They need medical help for math anxiety.
   - C. They need extra help to catch up in the math class.
   - D. They have strong negative emotions towards math.
2. **What is the widespread misunderstanding about math anxiety?**
   - A. It will gradually pass away without teachers’ help.
   - B. It affects low performing children only.
   - C. It is related to a child’s low intelligence.
   - D. It exists mostly among children from poor families.
3. **What does the passage say about British students with math anxiety?**
   - A. Most of them have average to strong math ability.
   - B. Most of them get timely help from their teachers.
   - C. They will regain confidence with counselling.
   - D. They are mostly secondary school students.
4. **What conclusion has the world health organization come to recently?**
   - A. Social media addiction is a threat to our health.
   - B. Too many people are addicted to smartphones.
   - C. Addiction to computer games is a disease.
   - D. Computer games can be rather addictive.
5. **What is said of people with addictive behavior?**
   - A. They prioritize their favored activity over what they should do.
   - B. They do their favored activity whenever and wherever possible.
   - C. They are unaware of the damage their behavior is doing to them.
   - D. They are unable to get rid of their addiction without professional help.
6. **What do some behaviour experts think of addiction to computer games?**
   - A. It may be less damaging than previously believed.
   - B. There will never be agreement on its harm to people.
   - C. It may prove to be beneficial to developing creativity.
   - D. There is not enough evidence to classify it as a disease.
7. **What do we learn about most European passports?**
   - A. They are relatively uniform in color and design.
   - B. They appear more formal than other passports.
   - C. They are a shade of red bordering on brown.
   - D. They vary in color from country to country.
8. **What does the passage say about the design of passports?**
   - A. They must endure wear and tear.
   - B. They must be of the same size.
   - C. They must be made from a rare material.
   - D. They must follow some common standards.
9. **Why are dark colors chosen for passport covers?**
   - A. They look more traditional.
   - B. They look more official.
   - C. They are favored by airlines.
   - D. They are easily identifiable.
10. **What is one special function of the images inside many passports?**
    - A. For beauty.
    - B. For variety.
    - C. For visibility.
    - D. For security.

Part III 阅读理解 (Reading Comprehension)

Section A 选词填空

Word Bank（词库）

A) announce
B) commonplace
C) confess
D) desperate
E) experience
F) fascinated
G) option
H) prompted
I) roughly
J) routinely
K) shining
L) showering
M) variety
N) voyage
O) wonder

Nowadays you can’t buy anything without then being asked to provide a rating of a company’s performance on a five-star scale.
I’ve been asked to rate my “store __26__” on the EFTPOS terminal before I can pay. Even the most __27__ activities, such as calling Telstra or picking up a parcel from Australia Post, are followed by texts or emails with surveys asking, “How did we do?”
Online purchases are __28__ followed up by a customer satisfaction survey. Companies are so __29__ for a hit of stars that if you delete the survey the company sends you another one.
We’re __30__ to rate our apps when we’ve barely had a chance to use them. One online course provider I use asks you what you think of the course after you’ve only completed __31__ 2 percent of it.
Economist Jason Murphy says that companies use customer satisfaction ratings because a __32__ display of star feedback has become the nuclear power sources of the modern economy.
However, you can’t help but __33__ if these companies are basing their business on fabrications (捏造的东西). I __34__ that with online surveys I just click the __35__ that’s closest to my mouse cursor (光标) to get the damn thing off my screen. Often the star rating I give has far more to do with the kind of day I’m having than the purchase I just made.

空格题号：26、27、28、29、30、31、32、33、34、35

Section B 段落匹配

Directions: 阅读下列段落，为每个句子选出所对应的段落。每个段落可能被选一次、多次或不被选择。

A How do early career setbacks affect our long-term success? Failures can help us learn and overcome our fears. But disasters can still wound us. They can screw us up and set us back. Wouldn’t it be nice if there was genuine, scientifically documented truth to the expression “what doesn’t kill you makes you stronger”?

B One way social scientists have probed the effects of career setbacks is to look at scientists of very similar qualifications. These scientists, for reasons that are mostly arbitrary, either just missed getting a research grant or just barely made it. In social sciences, this is known as examining “near misses” and “narrow wins” in areas where merit is subjective. That allows researchers to measure only the effects of being chosen or not. Studies in this area have found conflicting results. In the competitive game of biomedical science, research has been done on scientists who narrowly lost or won grant money. It suggests that narrow winners become even bigger winners down the line. In other words, the rich get richer.

C A 2018 study published in the Proceedings of the National Academy of Sciences, for example, followed researchers in the Netherlands. Researchers concluded that those who just barely qualified for a grant were able to get twice as much money within the next eight years as those who just missed out. And the narrow winners were 50 percent more likely to be given a professorship.

D Others in the US have found similar effects with National Institutes of Health early-career fellowships launching narrow winners far ahead of close losers. The phenomenon is often referred to as the Matthew effect, inspired by the Bible’s wisdom that to those who have, more will be given. There’s a good explanation for the phenomenon in the book The Formula: The Universal Laws of Success by Albert Laszlo Barabasi. According to Barabasi, it’s easier and less risky for those in positions of power to choose to hand awards and funding to those who’ve already been so recognized.

E This is bad news for the losers. Small early career setbacks seem to have a disproportionate effect down the line. What didn’t kill them made them weaker. But other studies using the same technique have shown there’s sometimes no penalty to a near miss. Students who just miss getting into top high schools or universities do just as well later in life as those who just manage to get accepted. In this case, what didn’t kill them simply didn’t matter. So is there any evidence that setbacks might actually improve our career prospects? There is now.

F In a study published in Nature Communications, Northwestern University sociologist Dashun Wang tracked more than 1,100 scientists who were on the border between getting a grant and missing out between 1990 and 2005. He followed various measures of performance over the next decade. These included how many papers they authored and how influential those papers were, as measured by the number of subsequent citations. As expected, there was a much higher rate of attrition (减员) among scientists who didn’t get grants. But among those who stayed on, the close losers performed even better than the narrow winners. To make sure this wasn’t by chance, Wang conducted additional tests using different performance measures. He examined how many times people were first authors on influential studies, and the like.

G One straightforward reason close losers might outperform narrow winners is that the two groups have comparable ability. In Wang’s study, he selected the most determined, passionate scientists from the loser group and culled (剔除) what he deemed the weakest members of the winner group. Yet the persevering losers still came out on top. He thinks that being a close loser might give people a psychological boost, or the proverbial kick in the pants.

H Utrecht University sociologist Arnout van de Rijt was the lead author on the 2018 paper showing the rich get richer. He said the new finding is apparently reasonable and worth some attention. His own work showed that although the narrow winners did get much more money in the near future, the actual performance of the close losers was just as good.

I He said the people who should be paying regard to the Wang paper are the funding agents who distribute government grant money. After all, by continuing to pile riches on the narrow winners, the taxpayers are not getting the maximum bang for their buck if the close losers are performing just as well or even better. There’s a huge amount of time and effort that goes into the process of selecting who gets grants, he said, and the latest research shows that the scientific establishment is not very good at distributing money. “Maybe we should spend less money trying to figure out who is better than who,” he said, suggesting that some more equal dividing up of money might be more productive and more efficient. Van de Rijt said he’s not convinced that losing out gives people a psychological boost. It may yet be a selection effect. Even though Wang tried to account for this by culling the weakest winners, it’s impossible to know which of the winners would have quit had they found themselves on the losing side.

J For his part, Wang said that in his own experience, losing did light a motivating fire. He recalled a recent paper he submitted to a journal, which accepted it only to request extensive editing, and then reversed course and rejected it. He submitted the unedited version to a more respected journal and got accepted.

K In sports and many areas of life, we think of failures as evidence of something we could have done better. We regard these disappointments as a fate we could have avoided with more careful preparation, different training, a better strategy, or more focus. And there it makes sense that failures show us the road to success. These papers deal with a kind of failure people have little control over--rejection. Others determine who wins and who loses. But at the very least, the research is starting to show that early setbacks don’t have to be fatal. They might even make us better at our jobs. Getting paid like a winner, though? That’s a different matter.

待匹配句子

36. Being a close loser could greatly motivate one to persevere in their research.
37. Grant awarders tend to favor researchers already recognized in their respective fields.
38. Suffering early setbacks might help people improve their job performance.
39. Research by social scientists on the effects of career setbacks has produced contradictory findings.
40. It is not to the best interest of taxpayers to keep giving money to narrow winners.
41. Scientists who persisted in research without receiving a grant made greater achievements than those who got one with luck, as suggested in one study.
42. A research paper rejected by one journal may get accepted by another.
43. According to one recent study, narrow winners of research grants had better chances to be promoted to professors.
44. One researcher suggests it might be more fruitful to distribute grants on a relatively equal basis.
45. Minor setbacks in their early career may have a strong negative effect on the career of close losers.

Section C 阅读理解

Passage One

Boredom has become trendy. Studies point to how boredom is good for creativity and innovation, as, well as mental health. It is found that people are more creative following the completion of a tedious task. When people are bored, they have an increase in “associative thought” —the process of making new connections between ideas, which is linked to innovative thinking. These studies are impressive, but in reality, the benefits of boredom may be related to having time to clear your mind, be quiet, or daydream.
In our stimulation-rich world, it seems unrealistic that boredom could occur at all. Yet, there are valid reasons boredom may feel so painful. As it turns out, boredom might signal the fact that you have a need that isn’t being met.
Our always-on world of social media may result in more connections, but they are superficial and can get in the way of building a real sense of belonging. Feeling bored may signal the desire for a greater sense of community and the feeling that you fit in with others around you. So take the step of joining an organization to build face-to-face relationships. You’ll find depth that you won’t get from your screen no matter how many likes you get on your post.
Similar to the need for belonging, bored people often report that they feel a limited sense of meaning. It’s a fundamental human need to have a larger purpose and to feel like we’re part of something bigger than ourselves. When people are bored, they’re more likely to feel less meaning in their lives. If you want to reduce boredom and increase your sense of meaning, seek work where you can make a unique contribution, or find a cause you can support with your time and talent.
If your definition of boredom is being quiet, mindful, and reflective, keep it up. But if you’re struggling with real boredom and the emptiness it provokes, consider whether you might seek new connections and more significant challenges. These are the things that will genuinely relieve boredom and make you more effective in the process.

1. **What have studies found about boredom?**
   - A. It facilitates innovative thinking.
   - B. It is a result of doing boring tasks.
   - C. It helps people connect with others.
   - D. It does harm to one’s mental health.
2. **What does the author say boredom might indicate?**
   - A. A need to be left alone.
   - B. A desire to be fulfilled.
   - C. A conflict to be resolved.
   - D. A feeling to be validated.
3. **What do we learn about social media from the passage?**
   - A. It may be an obstacle to expanding one’s connections.
   - B. It may get in the way of enhancing one’s social status.
   - C. It may prevent people from developing a genuine sense of community.
   - D. It may make people feel that they ought to fit in with the outside world.
4. **What does the author suggest people do to get rid of boredom?**
   - A. Count the likes they get on their posts.
   - B. Reflect on how they relate to others.
   - C. Engage in real-life interactions.
   - D. Participate in online discussions.
5. **What should people do to enhance their sense of meaning?**
   - A. Try to do something original.
   - B. Confront significant challenges.
   - C. Define boredom in their unique way.
   - D. Devote themselves to a worthy Cause.

Passage Two

Can you remember what you ate yesterday? If asked, most people will be able to give a vague description of their main meals: breakfast, lunch, dinner. But can you be sure you’ve noted every snack bar in your car, or every handful of nuts at your desk? Most people will have a feeling that they’ve missed something out.
We originally had this suspicion back in 2016, puzzled by the fact that national statistics showed calorie consumption falling dramatically over past decades. We found reliable evidence that people were drastically under-reporting what they ate.
Now the Office for National Statistics has confirmed that we are consuming 50% more calories than our national statistics claim.
Why is this happening? We can point to at least three potential causes. One is the rise in obesity levels itself. Under-reporting rates are much higher for obese people, because they simply consume more food, and thus have more to remember.
Another cause is that the proportion of people who are trying to lose weight has been increasing over time. People who want to lose weight are more likely to under-report their eating- regardless of whether they are overweight or not. This may be driven partly by self-deception or “wishful thinking”.
The final potential cause is an increase in snacking and eating out over recent decades—both in terms of how often they happen and how much they contribute to our overall energy intake. Again, there is evidence that food consumed out of the home is one of the most poorly recorded categories in surveys.
So, what’s the message conveyed? For statistics, we should invest in more accurate measurement options. For policy, we need to focus on options that make it easy for people to eat fewer calories. If people do not know how much they are eating, it can be really hard for them to stick to a diet. Also, we should be looking for new ways to ensure what people eat wouldn’t have much impact on their waistlines. If this works, it won’t matter if they can’t remember what they ate yesterday.

1. **What did the author suspect back in 2016?**
   - A. Calorie consumption had fallen drastically over the decades.
   - B. Most people surveyed were reluctant to reveal what they ate.
   - C. The national statistics did not reflect the actual calorie consumption.
   - D. Most people did not include snacks when reporting their calorie intake.
2. **What has the Office for National Statistics verified?**
   - A. People’s calorie intake was far from accurately reported.
   - B. The missing out of main meals leads to the habit of snacking.
   - C. The nation’s obesity level has much to do with calorie intake.
   - D. Calorie consumption is linked to the amount of snacks one eats.
3. **What do we learn about obese people from the passage?**
   - A. They usually keep their eating habits a secret.
   - B. They overlook the potential causes of obesity.
   - C. They cannot help eating more than they should.
   - D. They have difficulty recalling what they have eaten.
4. **What often goes unnoticed in surveys on food consumption?**
   - A. The growing trend of eating out.
   - B. The potential causes of snacking.
   - C. People’s home energy consumption.
   - D. People’s changing diet over the years.
5. **What does the author suggest policymakers do about obesity?**
   - A. Remind people to cut down on snacking.
   - B. Make sure people eat non-fattening food.
   - C. Ensure people don’t miss their main meals.
   - D. See that people don’t stick to the same diet.

Part IV 翻译 (Translation)

Directions: For this part, you are allowed 30 minutes to translate a passage from Chinese into English.

龙井(Longjing)是一种绿茶，主要产自 中国东部沿海的浙江省。龙井茶独特的香味和口感为其赢得了“中国名茶”的称号，在中国深受大众的欢迎，在海外饮用的人也越来越多。龙井茶通常手工制作，其价格可能极其昂贵，也可能比较便宜，这取决于茶的生长地、采摘时间和制作工艺。龙井茶富含维生素 C 和其他多种有益健康的元素。经常喝龙井茶有助于减轻疲劳、延缓衰老。

听力原文 / Transcripts

新闻听力原文 / News Report（英文）

College English Test Band 4, Part 2, Listening Comprehension, Section A, Directions.
In this section, you'll hear three news reports. At the end of each news report, you'll hear two or three questions.
Both the news report and the questions will be spoken only once. After you hear a question, you must choose the best answer from the four choices,
Mark A, B, C, and D. Then Mark the corresponding letter on answer sheet 1 with a single line
through the center.
News report 1.
In 81 year old man ended up in Germany by accident. After trying to get from Newcastle,
Great Britain, to Rome, Italy. The old age pensioner was on a mission to see the Pope,
who is head of the Catholic Church and decided to make his way there by car.
He was surprised when his GPS system told him he had arrived.
Although there were no signs of any of the famous buildings or architecture.
The man parked but didn't put on the handbrake of his car properly.
His car rolled backwards and in a striking display of irony,
Hit a sign, saying, Rome.
The small town in North Germany, he had mistakenly plugged into the GPS system.
Police said that the car had come to a halt after hitting the sign.
But did not appear to be seriously damaged, although an ambulance was called to check
on the pensioner.
The man who lives in the UK and is originally Italian might have been confused by the fact
that Rome is written Roma in Italian and Rome in German.
Question 2. What finally happened to the old man?
News report 2. Glasgow has pledged to become the first carbon neutral city in the UK.
The city's Council and Scottish power have announced a range of strategies in an attempt
to reduce carbon emissions ahead of the new national target of 2045.
First Minister, Nicholas Sturgeon, welcomed the pledge and said, today's announcement
between Scottish power and Glasgow City Council to make Glasgow the UK's first net-zero
city is a very welcome step.
Raging our goals will need exactly this kind of partnership approach, with government, business,
local authorities and citizens all playing their part.
Speaking ahead of the all energy conference being held in Glasgow, Scottish power chief
executive Keith Anderson said, we have a large supply of renewable energy on our doorstep
and one of the only two low-emission zones in action across the UK.
Now, we need to invest in the technologies and programs that transform the rest of
Blades goes economy and make us net zero before anyone else.
Questions 3 and 4 are based on the news report you have just heard?
Question 3.
What do we learn from the news report?
Question 4. What did Scottish powers chief executive say ahead of the all-energy conference?
News Report 3.
A Japanese IT firm has officially introduced an office cat policy to combat the stressful
environment of the workplace.
A total of nine furry friends freely wander around in the office and do whatever their
little hearts desire.
He did no boo Fukata, who heads the firm, introduced the pet policy upon request from one
of his employees, allowing staff to bring their own cats to work.
Employee Eriito is grateful for the animal's comforting ways.
Cats are sleeping just beside us.
It's healing, she said.
Not only does Fukuda encourage bringing cats to the job, but he also encourages his
employees to rescue cats from overpopulated shelters or streets.
He gives 5,000 yen about 45 US dollars a month to those who rescue a cat.
While the positives are many, there's still some obstacles.
Sometimes a cat will walk on a phone and cut off the call, or they shut down the computers
by walking onto the off switch, ethoses.
Still, cats in the workplace have been a tremendous success for the company.
The policy has led to various other companies doing the same.
Questions 5-7 are based on the news report you have just heard.
Question 5.
What do we learn from the news report about the Japanese IT firm?
Question 6. What does Fukuda encourage his employees to do?
Question 7. What does the news reports say about the firm's policy?

长对话听力原文 / Conversations（英文）

Section B, Directions. In this section you will hear two long conversations. At the end of each conversation you will hear four questions. Both the conversation and the questions will be spoken only once.
After you hear a question, you must choose the best answer from the four choices marked
A, B, C, and D. Then mark the corresponding letter on answer sheet 1 with a single line
through the center. Conversation 1
Has Jibby been coming in lately?
No, I haven't seen him around. Why has he been causing any trouble?
Not that I know of, but I need to see him because my friends and I lent him some money last month,
and we haven't heard from him since.
I heard he comes here a lot, so I thought I'd come in and check with you.
Well, that's funny.
Some other fellow came in asking for Jimmy just yesterday.
A real nervous, pushy type of fellow.
Saying he needed Jimmy for some steady project they were working on.
But I can't quite remember what it was all about. Is this a lot of money we're talking about here?
No, just 60 pounds between the three of us, but still a bit too much to just let go.
He told us he'd got into an accident. Nothing serious, mind you, but he damaged someone's car and wanted to get some money together to make up for the damage he'd caused.
Hmm, isn't that sort of thing usually covered by insurance?
And then if he still wanted to give money as some sort of apology or something, he probably
shouldn't have to go around borrowing it from people.
You think Jim is just making it all up?
See, I did think it was a bit weird for him to be asking for money for that sort of thing,
and his story was a bit vague to begin with.
But I thought maybe he doesn't want his parents to know about what happened.
So he'd rather come to us and keep things quiet.
Anyway, Jimmy's a good guy, so we didn't make a fuss about it.
Questions 8 to 11 are based on the conversation you have just heard?
Question 8.
What does the man want to do?
Question 9. What do we learn about the man who came to see the woman yesterday?
Question 10. What did Jimmy say happened to him one day?
Question 11. Why did Jimmy borrow money according to the man?
I've never done it before and I know that you've been doing it for ages.
Sure, I love getting my shopping delivered.
It makes life so much simpler.
No carrying heavy shopping bags in the rain or trying to park the car in those huge supermarket
car parks.
Then not being able to find it again after you come out of the shops.
But there must be some problems.
I mean, how do you know that you won't get bad fruit?
Or that the eggs won't be broken?
Oh, come on.
The food is exactly the same as the stuff you buy in a conventional shop.
They aren't going to deliver you food that is out of date.
And, if you get a broken egg, well, that could happen in a conventional shop too.
If anything, it's really wrong.
You can just take photographs of the damage and they will give you the money back or replace the item.
How about delivery fees? Is it not more expensive to get everything delivered?
I actually found that it was cheaper for me as I live quite far away from my local supermarket,
so with the deliveries I'm actually saving on petrol.
I never thought of that.
If you aren't driving your own car, then you are saving on fuel.
Right, you've convinced me.
I'm going to go on the computer now and give it a try.
So which supermarket do you think is the best to order from?
Oh no, that's definitely up to you.
Otherwise, will the hero day?
Questions 12-15 are based on the conversation you have just heard.
Question 12- What did the woman want to ask Max about?
Question 13. What does the man think is a problem with shopping and supermarkets?
Question 14. What is the woman's concern about shopping online?
Question 15. What does the man find about

听力篇章原文 / Passages（英文）

Section C, directions. In this section you will hear three passages. At the end of each passage, you will hear three or four questions. Both the passage and the questions will be spoken only once.
After you hear a question, you must choose the best answer. From the four choices marked A, B, C, and D, then mark the corresponding letter on answer sheet 1 with a single line through the center.
Passage 1. A recent study found that 10% of British children suffer from math and anxiety.
This means they have overwhelming negative emotions towards the subject, ranging from
rage to despair. Other emotions triggered by math include feelings of tension and frustration.
Physical symptoms include a racing heart or struggling to catch breath. The phenomenon
of math anxiety, its characterised as a general sense of feeling that the subject is hard
compared with other subjects, leading to a subsequent lack or loss of confidence.
The researchers said they investigated individuals' attitudes towards mathematics
because of what could be referred to as a mathematics crisis in the UK.
There is a widespread misunderstanding that only low-performing children suffer from math anxiety.
People automatically assume children are anxious about math because they are poor achievers.
In fact, more than three quarters of children with high levels of math and anxiety are normal to high achievers.
Probably their math and anxiety will go unnoticed because their performance is good.
But, in the long term, their performance is negatively affected.
So a real danger here is that children who are completely able to do math at a normal level
may keep away from it because they feel anxious.
Math and Zarty can severely disrupt students' performance in the subject in both primary
and secondary school.
But importantly, and surprisingly, this new study suggests that the majority of students
Experiencing, math and zati have normal to high math ability.
Question 16 to 18 are based on the passage you have just heard.
Question 16 What did a recent study find about some British children?
Question 17 What is the widespread misunderstanding about math anxiety?
Question 18 What does the passage say about British students with math anxiety?
Passage 2 People spend a lot of time using phones and computers.
Much of that time is devoted to text messages and social media.
But many people choose to spend their time playing computer games.
For years, parents and teachers have worried that these games might be addictive.
And now, the World Health Organization has recognized addiction to computer games as a disease.
The organization explains that this decision reflects general agreement among experts around the world that some people have a problem with these games.
They show a pattern of behavior characterized by a lack of control.
Such people make computer games a priority over their responsibilities.
They may play games instead of attending school or work or socializing.
According to the World Health Organization experts,
people's use of computer games is different from their use of the internet, social media,
and online shopping.
These experts claim there is not sufficient data to indicate that people's reliance on those
other activities is an addiction.
But they argue that playing computer games to access is different.
This behavior can become a disorder.
To meet the new definition for addiction, the behavior must damage a person's relationships
or performance at school or work.
And this must last for at least a year.
Still, not all behavior experts agree.
Some argue that there is not enough research on the subject.
Thus, they claim it is too early to call computer game addiction a disorder.
Questions 19-21 are based on the passage you have just heard.
Question 19.
What conclusion has the world health organization come to recently?
Question 20. What is said of people with addictive behavior?
Question 21. What do some behaviour experts think of addiction to computer games?
Passage 3 Maybe you carry the most powerful passport in the world, or perhaps the rarest
passport.
Whatever the case, your passport will likely be one of four colours. Red, blue, green, or black.
Although there are slight variations. Switzerland's passport is dark red, for example.
While most European countries prefer a shade of red that's almost brown, there are no official rules
regarding passport colours.
But countries follow a certain set of norms when designing them.
The International Civil Aviation Organization, which works to define the principles of air travel,
suggests that countries use a suitable type, size and style for official documents like
passports.
There are also a few compulsory aspects of passports.
They must be made from a material that bends.
They should be able to be read by machine at temperatures ranging from 10 degrees Celsius
to 50 degrees Celsius and conditions where the air can be extremely dry or moist.
Despite these existing recommendations, there is nothing regarding the cover colour.
Why?
Simply put, countries stick to darker and more conservative colours because they appear
more official.
and they can also hide dirt and wear. While there's little innovation when it comes to passport
cover colour, the saying cannot be said for the pages. The passports of many countries contain
images of their well-known geographical features and wildlife, which also function as security
features, as some are only visible under a special light.
Questions 22-25 are based on the passage you have just heard.
Question 22. What do we learn about most European passports?
Question 23. What does the passage say about the design of passports?
Question 24. Why are dark colors chosen for passport covers?
Question 25. What is one special function of the images inside many passports?
That's the end of listening comprehension.
