2020年07月四级真题第1套

原卷 / Question Paper · 年份 2020 | 月份 7 | 第 一 套 | 时长 125 分钟 | 满分 710（及格 425）

Part I　写作 (Writing)

Directions: For this part, you are allowed 30 minutes to write an essay on the use of translation apps. You can start your essay with the sentence “ The use of translation apps is becoming increasingly popular.” You should write at least 120 words but no more than 180 words.

建议时间：30 分钟 | 字数：120-180 | 分值：15

作答区

Part II　听力理解 (Listening Comprehension)

Section A news

短新闻

听力音频：audio/SectionA.mp3（见离线包 papers 目录对应 audio 文件夹）

1. **What were people in parts of Scotland advised to do?**
   A. Watch the weather forecast.
   B. Evacuate the area with the orange alert.
   C. Avoid travel on Wednesday.
   D. Prepare enough food and drink.
2. **What did the head of road policing urge drivers to do?**
   A. Pay more attention to the roads.
   B. Stay at a safer place.
   C. Bring more mobile phones.
   D. Take a train home.
3. **What is the news report mainly about?**
   A. There is only one ecosystem in Europe.
   B. Romania’ s wetlands thrive again.
   C. The wildlife in Romania isn’ t well protected.
   D. There are 200 species of birds in Romania’ s wetlands.
4. **What did government officials propose to do to protect the endangered fish?**
   A. Block the waterways.
   B. Restore the fishing ban.
   C. Use monitoring equipment.
   D. Prohibit fishing in the next 10 years.
5. **What happened to Scott a month ago?**
   A. He had a car accident.
   B. He attended his graduation ceremony.
   C. He had a heart attack.
   D. He gave a performance in the auditorium.
6. **What did Scott ask about when he regained consciousness?**
   A. What happened to him.
   B. What date it was.
   C. When the graduation ceremony was.
   D. Where he was.
7. **Why was Scott speechless at the graduation ceremony?**
   A. He was really touched by his classmates.
   B. He didn’ t know what happened at all.
   C. He couldn’ t remember what to say.
   D. His parents wore caps and gowns.

Section B conversations

长对话

听力音频：audio/SectionB.mp3（见离线包 papers 目录对应 audio 文件夹）

1. **What does the woman say is the disadvantage of working from home?**
   A. Her children’ s disruption.
   C. A sense of isolation.
   B. Quiet atmosphere.
   D. Longer working hours.
2. **What does the man say is counter-productive to getting work done in the library?**
   A. It doesn’ t offer coffee.
   C. It doesn’ t have free Wi-Fi.
   B. It’ s too quiet.
   D. It lacks the material he needs.
3. **What does the woman like about doing one’ s work in a cafe?**
   A. The sense of being out in the world.
   C. The coffee table.
   B. The coffee it provides.
   D. The comfortable working condition.
4. **What is most annoying for cafe owners according to the woman?**
   A. People don’ t order anything.
   B. People bring their laptops and paperwork.
   C. People occupy valuable table space in quiet times.
   D. People of two occupy a table for six.
5. **What makes the woman think about changing her job?**
   A. She is not satisfied with the salary.
   B. She is not capable of the job.
   C. She often works overtime.
   D. She’ s received a job offer from another company.
6. **What does the man say about people who keep changing their jobs?**
   A. They may be considered as less loyal.
   B. They won’ t get the promotion opportunities.
   C. They should take more responsibility at work.
   D. They will be given hiring priority.
7. **What does the woman say would happen even if she got promoted in her current company?**
   A. She might have to do extra work every day.
   C. She might not get enough vacation.
   B. She might not get a pay rise.
   D. She might not gain more experience.
8. **What benefit has the woman gained from changing her jobs frequently?**
   A. Experience.
   C. Fortune.
   B. Confidence.
   D. Opportunity.

Section C passages

听力篇章

听力音频：audio/SectionC.mp3（见离线包 papers 目录对应 audio 文件夹）

1. **What does the speaker say about being alone?**
   A. It’ s a horrible feeling.
   C. It’ s boring and dangerous.
   B. It can be a blessing.
   D. It’ s the most comfortable state.
2. **What does the speaker say helps reduce one’ s feeling of loneliness?**
   A. To be active.
   C. To travel abroad.
   B. To meet up with your friends.
   D. To seek advice from others.
3. **What is an advantage of spending one’ s time alone?**
   A. It provides a chance for people to think deeply.
   B. It makes us treasure the time.
   C. It enables one to identify true friends.
   D. It helps us take care of problems more efficiently.
4. **What do we learn about the speaker’ s father?**
   A. He is a harsh person.
   C. He is very demanding in his work.
   B. He is mean to others.
   D. He usually works very late.
5. **What does the speaker say about the housing project?**
   A. He moved out and divorced.
   B. It was plagued by drugs and gang violence.
   C. He lived there for 20 years.
   D. His parents would move into his new house.
6. **What do we learn about the speaker as a stock clerk?**
   A. He was only responsible for unloading food.
   B. He had to sign his name on every label.
   C. It was a hard and tedious job.
   D. He was required to work on Friday night.
7. **What means did scientists at University College London measure memory loss?**
   A. By recording the time people spend on TV.
   C. By using memory and fluency tests.
   B. By tracking people’ s living habits.
   D. By scanning people’ s brains.
8. **What contributed to memory decline in the participants?**
   A. Watching television for hours.
   C. Reading books and magazines.
   B. Playing video games.
   D. Surfing the Internet.
9. **What do the researchers say about their finding concerning the link between TV viewing and outsideness disease?**
   A. Television viewing may be a potential factor for Alzheimer’ s disease.
   B. Alzheimer’ s patients tend to watch television more than 3 hours a day.
   C. Some research has confirmed the link between them.
   D. Television watching is beneficial to Alzheimer’ s patients.
10. **What do the researchers suggest older people do?**
   A. Watch television no more than 3 hours each day.
   B. Balance television viewing with other contrasting activities.
   C. Watch some educational TV programs.
   D. Take more physical exercise

Part III　阅读理解 (Reading Comprehension)

Section A 选词填空

Word Bank（词库）

A) accessible
B) accounted
C) adaptation
D) appropriately
E) considerable
F) effective
G) ladder
H) misread
I) nomination
J) overlooked
K) promoting
L) senior
M) submission
N) suggesting
O) thankfully

“Science and everyday life cannot and should not be separated.” Those were the words uttered by pioneering British scientist Rosalind Franklin, who firmly believed that the pursuit of science should be __26__ to all.

As a woman working in the first half of the 20th century, Franklin’ s contributions to some of the greatest scientific discoveries of our time including the structure of DNA—were sadly __27__ in her lifetime.

More than 60 years after Franklin’ s death, we are __28__ living in a different world, where women play an important part in every echelon （阶层） of our society—not least in science, innovation, higher education and research. UK universities are world leaders when it comes to advancing and __29__ gender equality.

In the past decade, we have seen a __30__ increase in England in the number of women accepted on to full-time undergraduate degrees in science, technology, engineering and maths (Stem subjects). And in the last academic year, women __31__ for more than half of all Stem postgraduates at UK universities. Data shows us the __32__ to success gets harder for women to climb the further up they go. Although women make up the majority of undergraduates in our universities, just under half of academic staff are female. At __33__ levels, only a quarter of professors are women, and black women make up less than 2% of all female academic staff.

There are also stark differences in pay across grades. The gender pay gap based on median salaries across the sector in 2016 2017 was 13.7% , __34__ there is still some way to go to ensure women are rising through the ranks to higher grade positions and being paid __35__ .

空格题号：26、27、28、29、30、31、32、33、34、35

Section B 段落匹配

Directions: 阅读下列段落，为每个句子选出所对应的段落。每个段落可能被选一次、多次或不被选择。

A About 15 years ago, I was invited to join a knitting group. I agreed to give it a try.

B My mother had taught me to knit at 15, and I knitted in class throughout college and for a few years thereafter. Then decades passed without my touching a knitting needle. But within two Mondays in the group, I was hooked, not only on knitting but also on crocheting (钩织), and I was on my way to becoming a highly productive crafter.

C I’ ve made countless baby blankets, sweaters, scarves, hats and caps for newborns. I take a knitting project with me everywhere, especially when I have to sit still and listen. As I discovered in college, when my hands are busy, my mind stays focused on the here and now.

D It seems, too, that I’ m part of a national renewal of interest in needle and other handicrafts (手工艺). The Craft Yarn Council reports that a third of women ages 25 35 now knit or crochet. Even men and schoolchildren are swelling the ranks, among them my friend’ s three small grandsons. Last April, the council created a “ Stitch Away Stress” campaign in honor of National Stress Awareness Month. Dr. Herbert Benson, a pioneer in mind/body medicine and author of The Relaxation Response, says that the repetitive action of needlework can induce a relaxed state like that associated with meditation (沉思) and yoga. Once you get beyond the initial learning curve, knitting and crocheting can lower heart rate and blood pressure.

E But unlike meditation, craft activities result in tangible and often useful products that can enhance self-esteem. I keep photos of my singular accomplishments on my cellphone to boost my spirits when needed.

F Since the 1990s, the council has surveyed hundreds of thousands of knitters and crocheters, who routinely list stress relief and creative fulfillment as the activities’ main benefits. Among them is the father of a prematurely born daughter who reported that during the baby’ s five weeks in the intensive care unit, “learning how to knit infant hats gave me a sense of purpose during a time that I felt very helpless. It’ s a hobby that I’ ve stuck with, and it continues to help me cope with stress at work, provide a sense of order in hectic (忙乱的) days, and allow my brain time to solve problems.”

G A recent email from the yarn (纺纱) company Red Heart titled “ Health Benefits of Crocheting and Knitting” prompted me to explore what else might be known about the health value of activities like knitting. My research revealed that the rewards go well beyond replacing stress and anxiety with the satisfaction of creation.

H For example, Karen Hayes, a life coach in Toronto, conducts knitting therapy programs, including Knit to Quit to help smokers give up the habit, and Knit to Heal for people coping with health crises, like a cancer diagnosis or serious illness of a family member. Schools and prisons with craft programs report that they have a calming effect and enhance social skills. And having to follow instructions on complex craft projects can improve children’ s math skills.

I Some people find that craftwork helps them control their weight. Just as it’ s challenging to smoke while knitting, when hands are holding needles and hooks, there’ s less snacking and mindless eating out of boredom.

J I’ ve found that my handiwork with yarn has helped my arthritic (患关节 炎的) fingers remain more dexterous (灵巧 的) as I age. A woman encouraged to try knitting and crocheting after developing an autoimmune disease that caused a lot of hand pain reported on the Craft Yarn Council site that her hands are now less stiff and painful.

K A 2009 University of British Columbia study of 38 women with an eating disorder who were taught to knit found that learning the craft led to significant improvements. Seventy-four percent of the women said the activity lessened their fears and kept them from thinking about their problem.

L Betsan Corkhill, a wellness coach in Bath, England, and author of the book Knit for Health & Wellness, established a website, Stitchlinks, to explore the value of what she calls therapeutic knitting. Among her respondents, 54 percent of those who were clinically depressed said that knitting made them feel happy or very happy. In a study of60 self-selected people with persistent pain, Ms. Corkhill and colleagues reported that knitting enabled them to redirect their focus, reducing their awareness of pain. She suggested that the brain can process just so much at once, and that activities like knitting and crocheting make it harder for the brain to register pain signals. Perhaps most exciting is research that suggests that crafts like knitting and crocheting may help to keep off a decline in brain function with age. In a 2011 study, researchers led by Dr. Yonas Geda at the Mayo Clinic in Rochester interviewed a random (随机的) sample of1,321 people ages 70 89, most of whom were cognitively (在认知方面) normal, about the cognitive activities they engaged in late in life. The study, published in the Journal of Neuropsychiatry & Clinical Neurosciences, found that those who engaged in crafts like knitting and crocheting had a diminished chance of developing mild cognitive disorder and memory loss.

M Although it is possible that only people who are cognitively healthy would pursue such activities, those who read newspapers or magazines or played music did not show similar benefits. The researchers speculate that craft activities promote the development of nerve pathways in the brain that help to maintain cognitive health.

N In support ofthat suggestion, a 2014 study by Denise C. Park ofthe University ofTexas at Dallas and colleagues demonstrated that learning to knit or do digital photography enhanced memory function in older adults. Those who engaged in activities that were not intellectually challenging, either in a social group or alone, did not show such improvements.

O Given that sustained social contacts have been shown to support health and a long life, those wishing to maximize the health value of crafts might consider joining a group of like-minded folks. I for one try not to miss a single weekly meeting of my knitting group.

待匹配句子

36. When the author was a college student, she found that knitting helped her concentrate.

37. Knitting can help people stay away from tobacco.

38. Even men and children are now joining the army of knitters.

39. Being a member of a crafts group enhances one’ s health and prolongs one’ s life.

40. Knitting diverts people’ s attention from their pain.

41. The author learnt to knit as a teenager, but it was not until she was much older that she became keenly interested.

42. When people are knitting, they tend to eat fewer snacks.

43. Survey findings show that knitting can help people relieve stress.

44. According to a study, knitters and crocheters are less likely to suffer mild cognitive damage.

45. The products of knitting can increase one’ s sense of self-respect.

Section C 阅读理解

Passage One

The phrase almost completes itself: midlife crisis. It’ s the stage in the middle ofthe journey when people feel youth vanishing, their prospects narrowing and death approaching.

There’ s only one problem with the cliché (套话). It isn’ t true.

“In fact, there is almost no hard evidence for midlife crisis other than a few small pilot studies conducted decades ago,” Barbara Hagerty writes in her new book, Life Reimagined. The bulk of the research shows that there may be a pause, or a shifting of gears in the 40s or 50s, but this shift “can be exciting, rather than terrifying.”

Barbara Hagerty looks at some of the features of people who turn midlife into a rebirth. They break routines, because “autopilot is death.” They choose purpose over happiness－having a clear sense of purpose even reduces the risk of Alzheimer’ s disease. They give priority to relationships, as careers often recede (逐渐淡化).

Life Reimagined paints a picture of middle age that is far from gloomy. Midlife seems like the second big phase of decision-making. Your identity has been formed; you’ ve built up your resources; and now you have the chance to take the big risks precisely because your foundation is already secure.

Karl Barth described midlife precisely this way. At middle age, he wrote, “the sowing is behind; now is the time to reap. The run has been taken; now is the time to leap. Preparation has been made; now is the time for the venture of the work itself.”

The middle-aged person, Barth continued, can see death in the distance, but moves with a “measured haste” to get big new things done while there is still time.

What Barth wrote decades ago is even truer today. People are healthy and energetic longer. We have presidential candidates running for their first term in office at age 68, 69 and 74. A longer lifespan is changing the narrative structure of life itself. What could have been considered the beginning of a descent is now a potential turning point—the turning point you are most equipped to take full advantage of.

1. **What does the author think of the phrase “midlife crisis” ?**
   A. It has led to a lot of debate.
   B. It is widely acknowledged.
   C. It is no longer fashionable.
   D. It misrepresents real life.
2. **How does Barbara Hagerty view midlife?**
   A. It may be the beginning of a crisis.
   B. It can be a new phase of one’ s life.
   C. It can be terrifying for the unprepared.
   D. It may see old-age diseases approaching.
3. **How is midlife pictured in the book Life Reimagined?**
   A. It can be quite rosy.
   B. It can be burdensome.
   C. It undergoes radical transformation.
   D. It makes for the best part of one’ s life.
4. **According to Karl Barth, midlife is the time .**
   A. to relax
   B. to mature
   C. to harvest
   D. to reflect
5. **What does the author say about midlife today?**
   A. It is more meaningful than other stages of life.
   B. It is likely to change the narrative of one’ s life.
   C. It is more important to those with a longer lifespan.
   D. It is likely to be a critical turning point in one’ s life.

Passage Two

It’ s late in the evening: time to close the book and turn off the computer. You’ re done for the day. What you may not realize, however, is that the learning process actually continues—in your dreams.

It might sound like science fiction, but researchers are increasingly focusing on the relationship between the knowledge and skills our brains absorb during the day and the fragmented, often bizarre imaginings they generate at night. Scientists have found that dreaming about a task we’ ve learned is associated with improved performance in that activity (suggesting that there’ s some truth to the popular notion that we’ re “getting” a foreign language once we begin dreaming in it). What’ s more, researchers are coming to recognize that dreaming is an essential part of understanding, organizing and retaining what we learn.

While we sleep, research indicates, the brain replays the patterns of activity it experienced during waking hours, allowing us to enter what one psychologist calls a neural （神经的） virtual reality. A vivid example of such replay can be seen in a video researchers made recently about sleep disorders. They taught a series of dance moves to a group of patients with conditions like sleepwalking, in which the sleeper engages in the kind physical movement that does not normally occur during sleep. They then videotaped the subjects as they slept. Lying in bed, eyes closed, one female patient on the tape performs the dance moves she learned earlier.

This shows that while our bodies are at rest, our brains are drawing what’ s important from the information and events we’ ve recently encountered, then integrating that data into the vast store of what we already know. In a 2010 study, researchers at Harvard Medical School reported that college students who dreamed about a computer maze （迷宫） task they had learned showed a 10-fold improvement in their ability to find their way through the maze compared with participants who did not dream about the task.

Robert Stickgold, one of the Harvard researchers, suggests that studying right before bedtime or taking a nap following a study session in the afternoon might increase the odds of dreaming about the material. Think about that as your head hits the pillow tonight.

1. **What is scientists’ finding about dreaming?**
   A. It involves disconnected, weird images.
   B. It resembles fragments of science fiction.
   C. Dreaming about a learned task betters its performance.
   D. Dreaming about things being learned disturbs one’ s sleep.
2. **What happens when one enters a dream state?**
   A. The body continues to act as if the sleeper were awake.
   B. The neural activity of the brain will become intensified.
   C. The brain behaves as if it were playing a virtual reality video game.
   D. The brain once again experiences the learning activities of the day.
3. **What does the brain do while we are sleeping?**
   A. It systematizes all the data collected during the day.
   B. It substitutes old information with new data.
   C. It processes and absorbs newly acquired data.
   D. It classifies information and places it in different files.
4. **What does Robert Stickgold suggest about enhancing learning?**
   A. Having a little sleep after studying in the day.
   B. Staying up late before going to bed.
   C. Having a dream about anything.
   D. Thinking about the odds of dreaming about the material.
5. **What can be inferred about dreaming from the passage?**
   A. We may enhance our learning through dreaming.
   B. Dreaming improves your language ability.
   C. All sleepwalkers perform dance moves when they are sleeping.
   D. Taking a nap after learning can help you find the way through the maze.

Part IV　翻译 (Translation)

Directions: For this part, you are allowed 30 minutes to translate a passage from Chinese into English.

在中国，火锅已有2,000多年的历史，最早流行于最寒冷的地区，然后在很多地区盛行，出 现了具有地方特色的种类。吃火锅时，家人和朋友围坐在桌边，桌子中间放着热腾腾的火锅。吃火锅时，人们可以根据自 己的口味放肉、海鲜、蔬菜和其他配料， 自己烹饪。人们可以一边尽 情地聊天，一边享受美餐。
