2020年12月四级真题第3套

原卷 / Question Paper · 年份 2020 | 月份 12 | 第 三 套 | 时长 125 分钟 | 满分 710（及格 425）

Part I 写作 (Writing)

Directions: For this part, you are allowed 30 minutes to write on the topic Changes in the Way of Communication. You should write at least 120 words but no more than 180 words.

建议时间：30 分钟 | 字数：120-180 | 分值：15

作答区

Part II 听力理解 (Listening Comprehension)

Section A news

短新闻

听力音频：audio/SectionA.mp3（见离线包 papers 目录对应 audio 文件夹）

1. **What does the news report say about the waiter?**

A. He wanted to buy a home.
B. He suffered from a shock.
C. He lost a huge sum of money.
D. He did an unusual good deed.

2. **What did the customer try to do when she got her checkback?**

A. Invite the waiter to a fancy dinner.
B. Tell her story to the Daily News.
C. Give some money to the waiter.
D. Pay the waiter's school tuition.

3. **What is Maryf's vote on Tuesday about?**

A. Whether or not to move to the state’ s mainland.
B. How to keep the village from sinking into the sea.
C. Where to get the funds for rebuilding their village.
D. What to do about the rising level of the seawater.

4. **Why did Donna Bar say they wouldn't see the plan carried out anytime soon?**

A. It takes too long a time.
B. It costs too much money
C. It has to wait for the state's final approval.
D. It faces strong opposition from many villagers.

5. **What is the purpose of the social experiment?**

A. To investigate whether people are grateful for help.
B. To see whether people hold doors open for strangers.
C. To explore ways of inducing gratitude in people.
D. To find out how people express gratitude.

6. **What did Steve Ferren and his team do in the experiment?**

A. They induced strangers to talk with them.
B. They helped 15 to 20 people in bad mood.
C. They held doors open for people at various places.
D. They interviewed people who didn't say thank you.

7. **What do we learn from the news report?**

A. People can be educated to be grateful.
B. Most people express gratitude for help.
C. Most people have bad days and then.
D. People are ungrateful when in a bad mood.

Section B conversations

长对话

听力音频：audio/SectionB.mp3（见离线包 papers 目录对应 audio 文件夹）

1. **What is the man's purpose for calling the woman?**

A. To order a solar panel installation.
B. To report a serious leak in his roof.
C. To enquire about solar panel installations,
D. To complain about the faulty solar panels

2. **What do we learn about the man's neighbor from the conversation?**

A. He plans to install solar panels.
B. He owns a four-bedroom house.
C. He saves $300 a year.
D. He has a large family.

3. **What is one of the man's chief concerns?**

A. The service of the solar panel company.
B. The cost of a solar panel installation.
C. The maintenance of the solar panels.
D. The quality of the solar panels.

4. **How long will it take a typical household to make back the initial investment?**

A. One year and a half.
B. Less than four years.
C. Roughly six years.
D. About five years.

5. **Where is the conversation taking place?**

A. At a travel agency.
B. At an Australian airport.
C. At an airline transfer service.
D. At a local transportation authority.

6. **Why is the woman interested in package holidays?**

A. She would be able to visit more scenic spots.
B. She wanted to save as much money as possible.
C. She would like to have everything taken care of.
D. She wanted to spend more time with her family.

7. **How long does the woman want to go for the holiday?**

A. Four days.
B. Five days.
C. One week.
D. Two weeks.

8. **What does the women say she likes about the holiday package?**

A. Choosing some activities herself.
B. Spending Christmas with Australians.
C. Driving along the Great Ocean Road.
D. Learning more about wine making.

Section C passages

听力篇章

听力音频：audio/SectionC.mp3（见离线包 papers 目录对应 audio 文件夹）

1. **What will tourists have to do when they visit Indonesia's Bali Island?**

A. Bring their own bags when shopping.
B. Use public transport when traveling.
C. Dispose of their trash properly.
D. Pay a green tax upon arrival.

2. **What does the passage say about Indonesia?**

A. It has not been doing a good job in recycling.
B. It has witnessed a rise in accidental drowning.
C. It has not attracted many tourists in recent years.
D. It has experienced an overall decline in air quality.

3. **What is the new plan, Governor Costa recently announced?**

A. To charge a small fee on plastic products in supermarkets.
B. To ban single-use plastic bags and straws on Bali Island.
C. To promote the use of paper bags for shopping.
D. To impose a penalty on anyone caught littering.

4. **What do we learn from the passage about the North Atlantic right whale?**

A. It gives birth to several babies at a time.
B. It is the least protected mammal species.
C. Its breeding grounds are now better preserved.
D. Its population is now showing signs of increase.

5. **What has caused the decline of the whale population in recent years?**

A. Global warming.
B. Polluted seawaters.
C. Commercial hunting.
D. Decreasing birthrates.

6. **Why do the whales travel to the Northeast Coast of America in the early spring?**

A. To mate.
B. To look for food.
C. To escape hunters.
D. To seek breeding grounds.

7. **How do Americans and British people think of milk nowadays?**

A. They prefer to drink low-fat milk.
B. They think milk is good for health.
C. They consume less milk these days.
D. They buy more milk than the British.

8. **What opinion is becoming increasingly common about milk?**

A. It is not as healthy as once thought.
B. It is not easy to stay fresh for long.
C. It benefits the elderly more.
D. It tends to make people fat.

9. **Why does drinking milk cause pain in some people?**

A. They drink too many pints every day.
B. They are sensitive to certain minerals.
C. They lack the necessary proteins to digest it.
D. They have eaten food incompatible with milk.

10. **What does the passage say is a benefit of milk?**

A. It is easier for sick people to digest.
B. It provides some necessary nutrients.
C. It is healthier than other animal products.
D. It supplies the body with enough calories.

Part III 阅读理解 (Reading Comprehension)

Section A 选词填空

Word Bank（词库）

A) automation
B) concerns
C) enormously
D) fantastic
E) fascinated
F) feature
G) flexible
H) inevitably
I) interaction
J) leaning
K) matters
L) moving
M) promised
N) shape
O) spared

The things people make, and the way they make them, determine how cities grow and decline, and influence how empires rise and fall. So, any disruption to the world’ s factories __26__. And that disruption is surely coming. Factories are being digitised, filled with new sensors and new computers to make them quicker, more __27__ and more efficient.
Robots are breaking free from the cages that surround them, learning new skills and new ways of working. And 3D printers have long __28__ a world where you can make anything; anywhere, from a computerised design. That vision is __29__ closer to reality. These forces will lead to cleaner factories, producing better goods at lower prices, personalised to our individual needs and desires. Humans will be __30__ many of the dirty, repetitive, and dangerous jobs that have long been a __31__ of factory life. Greater efficiency __32__ means fewer people can do the same work. Yet factory bosses in many developed countries are worried about a lack of skilled human workers-and see __33__ and robots as a solution. But economist Helena Leurent says this period of rapid change in manufacturing is a __34__ opportunity to make the world a better place. “Manufacturing is the one system where you have got the biggest source of innovation, the biggest source of economic growth, and the biggest source of great jobs in the past. You can see it changing. That’ s an opportunity to __35__ that system differently, and if we can, it will have tremendous significance.”

空格题号：26、27、28、29、30、31、32、33、34、35

Section B 段落匹配

Directions: 阅读下列段落，为每个句子选出所对应的段落。每个段落可能被选一次、多次或不被选择。

A A) It was made of shiny, bright pink plastic with a Little Mermaid sticker on the front, and I carried it with me nearly every single day. My lunch box was one of my first prized possessions, a proud statement to everyone in my kindergarten; “I love Mermaid-Ariel on my lunch box”

B B) That bulky container served me well through my first and second grades, until the live-action version of 101 Dalmatians hit theaters, and I needed the newest red plastic box with characters like Pongo and Perdita on the front. I know I’ m not alone here—I bet you loved your first lunch box, too.

C C) Lunch boxes have been connecting kids to cartoons and TV shows and super-heroes for decades. But it wasn’ t always that way. Once upon a time, they weren’ t even boxes. As schools have changed in the past century, the midday meal container has evolved right along with them.

D D) Let’ s start back at the beginning of the 20th century—the beginning of the lunch box story, really. While there were neighborhood schools in cities and suburbs, one-room schoolhouses were common in rural areas. As grandparents have been saying for generations, kids would travel miles to school in the countryside (often on foot.)

E E) “You had kids in rural areas who couldn’ t go home from school for lunch, so bringing your lunch wrapped in a cloth, in oiled paper, in a little wooden box or something like that was a very long-standing rural tradition,” says Paula Johnson, head of food history section at the Smithsonian National Museum of American History in Washington, D. C.

F F) City kids, on the other hand, went home for lunch and came back. Since they rarely carried a meal, the few metal lunch buckets on the market were mainly for tradesmen and factory workers.

G G) After World War I, a bunch of changes reshaped schools—and lunches. More women joined the workforce. Small schools consolidated into larger ones, meaning more students were farther away from home.’ And the National School Lunch Act in 1946 made cafeterias much more common. Still, there wasn’ t much of a market for lunch containers—yet. Students who carried their lunch often did so in a re-purposed bucket or tin of some kind.

H H) And then everything changed in the year of 1950. You might as well call it the Year of the Lunch Box, thanks in large part to a genius move by a Nashville-based manufacturer, Aladdin Industries. The company already made square metal meal containers, the kind workers carried, and some had started to show up in the hands of school kids.

I I) But these containers were really durable, lasting years on end. That was great for the consumer, not so much for the manufacturer. So executives at Aladdin hit on an idea that would harness the newfound popularity of television. They covered lunch boxes with striking red paint and added a picture of TV and radio cowboy Hopalong Cassidy on the front.

J J) The company sold 600,000 units the first year. It was a major “Ah-ha!” moment, and a wave of other manufacturers jumped on board to capitalize on new TV shows and movies. “The Partridge Family, the Addams Family, the Six Million Dollar Man, the Bionic Woman-everything that was on television ended up on a lunch box,” says Allen Woodall. He’ s the founder of the Lunch Box Museum in Columbus, Georgia. “It was a great marketing tool because kids were taking that TV show to school with them, and then when they got home they had them captured back on TV,” he says.

K K) And yes, you read that right: There is a hunch box museum, right near the Chattahoochee River, Woodall has more than 2 ,000 items on display. His favorite? The Green Hornet lunch box, because he used to listen to the radio show back in the 1940s.

L L) The new trend was also a great example of planned obsolescence, that is, to design a product so that it will soon become unfashionable or impossible to use and will need replacing. Kids would beg for a new lunch box every year to keep up with the newest characters, even if their old lunch box was perfectly usable.

M M) The metal lunch box craze lasted until the mid-1980s, when plastic took over. Two theories exist as to why. The first—and most likely—is that plastic had simply become cheaper. The second theory possibly an urban myth- is that concerned parents in several states proposed bans on metal lunch boxes, claiming kids were using them as “weapons” to hit one another. There’ s a lot on the internet about a state-wide ban in Florida, but a few days worth of digging by a historian at the Florida State Historical Society found no such legislation. Either way, the metal lunch box was out.

N N) The last few decades have brought a new lunch box revolution, of sorts. Plastic boxes changed to lined cloth sacks, and eventually, globalism brought tiffin containers from India and bento boxes from Japan. Even the old metal lunch boxes have regained popularity. “I don’ t think the heyday (鼎盛时期) has passed,” says D. J. Jayasekara, owner and founder of lunchbox. com, a retailer in Pasadena, California. “I think it has evolved. The days of the ready-made, ‘you stick it in a lunch box and carry it to school’ are kind of done.”

O O) The introduction of backpacks changed the hunch box scene a bit, he adds. Once kids started carrying book bags, that bulky traditional hunch box was hard to fit inside. “But you can’ t just throw a sandwich in a backpack,” Jayasekara says. “It still has to go into a container.” That is, in part, why smaller and softer containers have taken off—they fit into backpacks.

P P) And don’ t worry—whether it’ s a plastic bento box or a cloth bag, lunch containers can still easily be covered with popular culture. “We keep pace with the movie industries so we can predict which characters are going to be popular for the coming months,” Jayasekara says. “You know, kids are kids.”

待匹配句子

36. Lunch containers were not necessary for school kids in cities.
37. Putting TV characters on lunch boxes proved an effective marketing strategy.
38. Smaller hunch boxes are preferred because they fit easily into backpacks.
39. Lunch boxes have evolved along with the transformation of schools.
40. Around the beginning of the nineteen fifties, some school kids started to use metal meal containers.
41. School kids are eager to get a new lunch box every year to stay in fashion.
42. Rural kids used to walk a long way to school in the old days.
43. The author was proud of using a hunch box in her childhood.
44. The most probable reason for the popularity of plastic hunch boxes is that they are less expensive.
45. The durability of metal meal containers benefited consumers.

Section C 阅读理解

Passage One

A growing number of U. S. bike riders are attracted to electric bikes for convenience, health benefits and their fun factor. Although ebikes first appeared in the 90s, cheaper options and longer-lasting batteries are breathing new life into the concept.
Established bike companies and startups are embracing ebikes to meet demand. About 34 million ebikes were sold worldwide last year, according to data from eCycleElectric Consultants. Most were sold in Europe and China, where the bikes already have exploded in popularity. Recently, the U. S. market has grown to 263 ,000 bikes, a 25% gain from the prior year.
The industry is benefiting from improved batteries as suppliers over the years developed technology for laptops, smartphones and electric cars. In 2004, the price of batteries used on ebikes fell, spurring European sales.
But lower cost options are emerging, too. This month, three U. S. bikeshare companies, Motivate, LimeBike and Spin, announced electric bicycles will be added to their fleets. New York-based Jump Bikes is already operating an electric bikeshare in Washington, D. C., and is launching in San Francisco Thursday. Rides cost $ 2 for 30 minutes.
The system works like existing dockless bikeshare systems, where riders unlock bikes through a smartphone app. “This is the beginning of a long-term shift away from regular pedal (踏板) to electric bikes,” said Jump Bikes CEO Ryan Rzepecki. “When people first jump on an ebike, their face lights up. It’ s exciting and joyful in a way that you don’ t get from a regular bike.”
Two years ago, CEO Chris Cocalis of Pivot Cycles, which sells high-end mountain bikes, found that U. S. bike shops weren’ t interested in stocking ebikes. Some retailers warned Cocalis that they’ d drop the brand if it came out with an electric bike.
Now that sales are taking off, the vast majority of bike dealers are asking Cocalis when he’ ll make an ebike available. “There’ s tremendous opportunity to get a generation of people for whom suffering isn’ t their thing,” Cocalis said. “Ebike riders get the enjoyable part of cycling without the massive suffering of climbing huge hills.”

1. **What do we learn from the passage about ebikes?**

A. Their health benefits and fun values outweigh their cost.
B. They did not catch public attention in the United States until the 1990s.
C. They did not become popular until the emergence of improved batteries.
D. Their widespread use is attributable to people’ s environmental awareness.

2. **What brought about the boost in ebike sales in Europe at the beginning of the century?**

A. Updated technology of bike manufacture.
B. The falling prices of ebike batteries.
C. Changed fashion in short-distance travel.
D. The rising costs for making electric cars.

3. **What is the prospect of the bike industry according to Ryan Rzepecki?**

A. More will be invested in bike battery research.
B. The sales of ebikes will increase.
C. It will profit from ebike sharing.
D. It will make a difference in people’ s daily lives.

4. **What prevented Chris Cocalis from developing ebikes sooner?**

A. Retailers’ refusal to deal in ebikes.
B. High profits from conventional bikes.
C. Users’ concern about risks of ebike riding.
D. His focus on selling costly mountain bikes.

5. **What makes Chris Cocalis believe there is a greater opportunity for ebike sales?**

A. The further lowering of ebike prices.
B. The public’ s concern for their health.
C. The increasing interest in mountain climbing.
D. The younger generation’ s pursuit of comfortable riding.

Passage Two

The terms “global warming” and “climate change” are used by many, seemingly interchangeably. But do they really mean the same thing?
Scientists shaped the history of the terms while attempting to accurately describe how humans continue to alter the planet. Later, political strategists adopted the terms to influence public opinion.
In 1975, geochemist Wallace Broecker introduced the term “climate change” in an article published by Science. In 1979, a National Academy of Sciences report used the term “global warming” to define increases in the Earth’ s average surface temperature, while “climate change” more broadly referred to the numerous effects of this increase, such as sea-level rise and ocean acidification(酸化).
During the following decades, some industrialists and politicians launched a campaign to sow doubt in the minds of the American public about the ability of fossil-fuel use, deforestation and other human activities to influence the planet’ s climate.
Word use played a critical role in developing that doubt. For example, the language and polls expert Frank Luntz’ s wrote a memo encouraging the use of “climate change” because the phrase sounded less scary than “global warming,” reported the Guardian.
However, Luntz’ s recommendation wasn’ t necessary. A Google Ngram Viewer chart shows that by 1993 climate change was already more commonly used in books than global warming. By the end of the next decade both words were used more frequently, and climate change was used nearly twice as often as global warming.
NASA used the term “climate change” because it more accurately reflects the wide range of changes to the planet caused by increasing amounts of greenhouse gases in the atmosphere.
The debate isn’ t new. A century ago, chemist Svante Arrhenius started one of the first debates over the potential for humans to influence the planet’ s climate. Arrhenius calculated the capability of carbon dioxide to trap heat in the Earth’ s atmosphere, but other chemists disagreed. Some argued that humans weren’ t producing enough greenhouse gases, while others claimed the effects would be tiny. Now, of course, we know that whatever you call it, human behavior is warming the planet, with grave consequences ahead.

1. **Why did politicians use the two terms “global warming” and “climate change”?**

A. To sway public opinion of the impact of human activities on Earth.
B. To more accurately describe the consequences of human activities.
C. To win more popular votes in their campaign activities.
D. To assure the public of the safety of existing industries.

2. **As used in a National Academy of Sciences report, the term “climate change” differs from “global warming” in that _________.**

A. it sounds less vague
B. it looks more scientific
C. it covers more phenomena
D. it is much closer to reality

3. **What did industrialists of the late 20th century resort to in order to mislead Americans?**

A. Made-up survey results.
B. Hired climate experts.
C. False research findings.
D. Deliberate choice of words.

4. **Why did NASA choose the term “climate change”?**

A. To obtain more funds.
B. For greater precision.
C. For political needs.
D. To avoid debate.

5. **What is the author’ s final conclusion?**

A. Global warming is the more accurate term.
B. Accuracy of terminology matters in science.
C. Human activities have serious effects on Earth.
D. Politics interferes with serious scientific debate.

Part IV 翻译 (Translation)

Directions: For this part, you are allowed 30 minutes to translate a passage from Chinese into English.

鱼是春节前夕 餐桌上不可或缺的一道菜， 因为汉语中“鱼” 字的发音与“余” 字的发音相同。 正由于这个象征性的意义， 春节期间鱼也作为礼物送给亲戚朋友。 鱼的象征意义据说源于中国传统文化。 中国人有节省的传统， 他们认为节省得愈多， 就感到愈为安全。 今天， 尽管人们愈来愈富裕了， 但他们仍然认为节省是一种值得弘扬的美德。

2020年12月四级真题第3套

听力原文 / Transcripts · 年份 2020 | 月份 12 | 第 三 套 | 时长 125 分钟 | 满分 710（及格 425）

听力原文 / Transcripts

新闻听力原文 / News Report（英文）

College English Test, Band 4, Part 2, Listening Comprehension

Section A, Directions

In this section you will hear three news reports. At the end of each news report you will hear two or three questions.

Both the news report and the questions will be spoken only once.

After you hear a question, you must choose the best answer from the four choices marked
A, B, C, and D. Then mark the corresponding letter on the answer she won with a single line
through the center.

News report 1.

A waiter has returned to check worth nearly $424,000 to retired social worker who lost it.

The waiter found a bank envelope while cleaning off a table last Saturday at a restaurant.

He ran outside but the customer was gone. He opened the envelope and got a shock.

After an unsuccessful search, the restaurant's owner called the Daily News for help.

The relieved customer was reunited with her check on Wednesday. It contained money from her
apartment sale, already planned for a down payment on a new home. The customer did not tip the
later after her meal. She tried to give him money later on, but he graciously declined.

The waiter, who's working his way through school, did accept the customer's apology and
gratitude and said he was happy to have helped her.

Questions 1 and 2 are based on the news report you have just heard.

Question 1. What does the news report say about the waiter?

Question 2. What did the customer try to do when she got her check back?

News report 2

The village of Marath in Alaska voted on Tuesday to move to the states mainland.

The move is due to global warming and rising sea levels.

Most of the villages 169 registered voters took part in the town hall meeting.

They decided in a vote of 89 to 78 to move from their land on Sarajhev island near the Arctic Circle.

Mayor of Council Secretary Donna Barr said the vote was largely symbolic.

It will be costly financially to the community.

About 15 years ago they estimated the cost at $180 million.

I would figure it's much higher now, Barr said.

We don't see the move happening in our lifetime because of the funding.

The villages, roughly 600-50 residents, have seen warming temperatures, melt sea ice,
and permanently frozen land. This has resulted in houses falling into the water.

At least 31 villages in Alaska face immediate threats due to climate change. The government accountability office reported in 2009. Questions 3 and 4 are based on the new support you have just heard. Question 3 What is Maryf's vote on Tuesday about?

Question 4. Why did Donna Bar say they wouldn't see the plan carried out anytime soon?

News report 3.

A man in Halifax, Canada wanted to find out if people were thankful for someone holding
the door open for them.

The social experiment showed that 99 out of 100 people expressed gratitude.

I didn't think we were going to get 99.

I don't know why, but I was pleasantly surprised because it went beyond just thank you.

People got into conversations with us.

Set Steve Foreann, CEO of Gratitude at Work.

What we know from research is that from grateful people come good things, he said.

A simple way to induce gratitude in people is opening doors and so we went to six places
and opened the doors for people.

For the experiment, Foreann's team went to a shopping centre, a mall, two office buildings,
and a coffee shop. The door was held for 15 to 20 people at a time at each location.

We did have one that didn't say thank you. We're not here to judge them, because on
any given day that could be me or you. I suspect out of the 100 people that were probably
a bunch of them having a bad day, but grateful people make people grateful, so for
Anne.

Question 6. What did Steve Ferren and his team do in the experiment?

Question 7. What do we learn from the news report?

长对话听力原文 / Conversations（英文）

Section B, Directions. In this section, you'll hear two long conversations. At the end of each conversation, you will hear four questions.

Both the conversation and the questions will be spoken only once. After you hear a question, you must choose the best answer from the four choices marked A, B, C and D.

Then marked the corresponding letter on answer sheet 1, with a single line through the center.

Conversation 1.

Raise solar, recess speaking, how can I help?

Hi, my name is Winston. I wish to enquire about solar panel installations.

Yes, what would you like to know?

Well, my neighbour installed panels on his roof about a year ago, in order to power his hot water.

He tells me it has saved him over $500 thus far. Does that sound about right to you?

Well, I'm not familiar with your neighbor or his particular setup. But that amount is definitely possible.

I can tell you that the average 4 bedroom house may typically have a roof with 50 square meters of surface area.

Four panels on one side of that roof could save a family of four around $300 a year.

Okay, that sounds about right then.

My house is about the size you described, but my neighbours is bigger.

I'm not sure how many panels he has up there, but he does have a large family of six.

Are you interested in stalling some solar panels on your roof sir?

Yes, I'm considering it.

If you wish to come into our office, we could show you the different solutions we offer.

OK, I might do that. But just quickly if you don't mind, could you tell me approximately
how much a typical installation costs? Like, say, four panels?

Prices do vary depending on different factors, but as a rough estimate, it's around $2000.

But you know, a typical household will make back that initial investment in about five years.

OK, I see. Thank you.

Question 8-11 are based on the conversation you have just heard.

Question 8- What is the man's purpose for calling the woman?

Question 9. What do we learn about the man's neighbor from the conversation?

Question 10. What is one of the man's chief concerns?

Question 11. How long will it take a typical household?

to make back the initial investment.

Conversation 2

Good afternoon. Sorry to have kept you waiting. How can I help you?

Oh, no problem. I'm interested in booking a holiday to Australia.

And wonder if you could tell me what deals you have?

Sure. Are you only looking for flights or a package holiday with everything included?

When you say everything, what do you mean?

Well, a package holiday would include your flights, hotels, meals,

Daterips to different places of interest and transport to and from the airport.

Yeah, that sounds pretty good. I'm going with my family, so it would be nice to have everything
taken care of. So what sort of deals do you have for package holidays then?

All sorts really? How long do you want to go for and of what dates?

Two weeks around Christmas time would be great.

Okay, let me check that for you.

Here's one, 14 nights in South Eastern Australia, 5 nights in Sydney and 5 nights in Melbourne.

And then for the other four nights you can choose from a list of trips to other places nearby.

You could visit Canberra, for example, or the Blue Mountains,
or you could go for a drive down the Great Ocean Road.

Also, if you're interested in wine, you could go on a tour of the places where they grow grapes and make wine.

That sounds great. It's good we can choose some activities ourselves.

Questions 12 to 15 are based on the conversation you have just heard. Question 12.

Where is the conversation taking place?

Question 13. Why is the woman interested in package holidays?

Question 14. How long does the woman want to go for the holiday?

Question 15. What does the women say she likes?

听力篇章原文 / Passages（英文）

Section C, directions. In this section, you'll hear three passages. At the end of each passage, you'll hear three or four questions.

Both the passage and the questions will be spoken only once. After you hear a question, you must choose the best answer from the four choices marked A, B, C and D.

Then mark the corresponding letter on Ansysheet 1 with a single line through the center.

Passage 1. Tourists taking a holiday in the Indonesian Island of Bali are facing a new
$14 per person tax when they arrive on the holiday island from next year.

But this is a green tax, which Bali Governor, Waiyan Costa, has been working on for months
and which is designed to help clean up the island's natural environment and with good reason too.

Indonesia is drowning in plastics.

Recycling is not one of the country's strong points.

It's not uncommon to be offered many more plastic bags than one could ever need when visiting supermarkets and shopping malls.

But slowly, things are starting to change for the better.

Back in 2016, the medium-sized city of Bunger Mason banned single-use plastic bags.

The city of Bogor followed suit in 2018.

A few months ago, Crossster announced a plan that would not only ban single-use plastic
bags from supermarkets and convenient stores, but plastic bags and straws across the island.

The regulation will come into full effect next month.

We received a fast and quick response from the Bollini's people.

Not only positive responses from the Bollini's, we received good responses from the central
government, other local governments, and even from overseas, costor told the Sydney Morning
Harrow this week during an interview.

The governor is a determined environmentalist and he has more laws planned to protect the island's waterways in particular and to support the introduction of electric vehicles too.

Question 16 to 18 are based on the passage you have just heard.

Question 16 What will tourists have to do when they visit Indonesia's Bali island?

Question 17. What does the passage say about Indonesia?

Question 18. What is the new plan, Governor Costa recently announced?

Passage 2. An endangered species of whale is experiencing a small baby boom of the
America. The Norfolk Atlantic right whale is one of the rare species of whale on the planet,
numbering only about 411. But the center for coastal studies said Friday that his aerial
survey team spotted a mum with two babies in Cape Cod Bay a day earlier. That brings the
number seen in nearby waters alone this year to three. That's big news because the whale
population has been falling, and no baby whales were seen last year. In all, seven baby
whales have been spotted so far this year. The whale population has become endangered due
to commercial wailing activities and recent years. This is because they are sometimes hunted
for their meat or their skin. Overhunting could lead to the disappearance of the whale
population, possibly causing major problems to the global food chain.

The whales give birth after southeast coast of America in the winter and travel to feeding
grounds of the northeast coast in the early spring.

The northeast coast is critically important source of food.

The animals often feed close to shore.

This provides watches on land with unbeatable views of one of the rarest of marine mammals.

It's illegal to get within 1,500 feet of the animals without a federal research permit,
so whale watches are discouraged from attempting to get close to the whales.

Questions 19-21 are based on the passage you have just heard.

Question 19.

What do we learn from the passage about the North Atlantic right whale?

Question 20. What has caused the decline of the whale population in recent years?

Question 21. Why do the whales travel to the Northeast Coast of America in the early spring?

Passage 3 An average person consumes 144 pints of milk a year.

But 40% of that is poured under cereal, and 60% of those people are children.

But what was once advertised as nutritious is becoming unpopular.

American's drink 37% less milk than they did in the 1970s.

And in the UK, dairy consumption overall has fallen by a third in the past 20 years.

Milk is increasingly being described in a negative light.

A recent blogs have justed, maybe people are drinking less milk because it is poisonous
to many of us.

Lactose is the sugar found in milk and dairy products.

It needs a series of complex proteins to break it down.

Without enough of these proteins, the lactose is broken down by bacteria in the human body.

This can cause physical pain and produce gas in the stomach.

However, after we have finished breast or formula feeding, most of us don't continue producing
the complex proteins in our body, which are necessary to break down the lactose.

Despite the problems in digesting milk, it does provide many benefits.

Milk is nutritious. It contains vitamins A and D, as well as protein, and isn't full of calories.

You can test yourself by drinking a large glass of milk. If you get sick in your stomach
Within the next 24 hours, you are lacking the proteins to digest milk.

Question 23. How do Americans and British people think of milk nowadays?

Question 24. Why does drinking milk cause pain in some people?

Question 25. What does the passage say is a benefit of milk?

That's the end of listening comprehension.
