2024年12月四级真题第2套

听力原文 / Transcripts · 年份 2024 | 月份 12 | 第 二 套 | 时长 125 分钟 | 满分 710（及格 425）

听力原文 / Transcripts

新闻听力原文 / News Report（英文）

College English Test Band 4. Part 2. Listening Comprehension. Section A. Directions. In this section, you'll hear three
news reports. At the end of each news report, you'll hear two or three questions. Both the news
reports and the questions will be spoken only once. After you hear a question, you must choose
the best answer from the four choices marked a, b, c, and d. Then mark the corresponding
letter on answer sheet 1 with a single line through the center.
News report 1. Across the US, families are looking to the winter with fear as energy costs
sore. A number of factors are creating a bad situation. Global energy consumption is
up, but supplies have been reduced.
The energy department projects heating bills will jump 28% this winter, for those who
rely on natural gas.
Natural gas is used by nearly half of US households for heat.
heating oil is projected to be 27% higher and electricity 10% higher.
That comes against inflation rates that accelerated last month, with consumer prices growing
6.6%. That's the fastest pace in four decades. The pain will be especially acute in
parts of the country that heavily rely on heating oil to keep homes warm. It's projected
to cost more than $2,300 to heat a typical home with heating oil this winter.
Last month, the federal government added $1 billion in funding to low-income home energy
assistance program, bringing the total to $4.8 billion. But that represents a reduction
from last year's energy assistance package of over $8 billion.
Questions 1 and 2 are based on the news report you have just heard.
Question 1. Why a family is across the US looking to this winter with fear?
Question 2. What did the federal government do last month?
News Report 2 Many Americans think they make healthy food choices, but they may be viewing
their diet too optimistically.
That's the main finding of a new study by researchers at the U.S. Department of Agriculture in Stonville, Mississippi.
The study aimed to identify disconnects between hell-healthily Americans think they eat and how they actually do.
For the study, the researchers asked participants to rate their diet as excellent, very good, good, fair, or poor.
Folks also completed 24-hour food questionnaires.
Then the researchers compared answers to see how well responses to the two exercises matched up.
Of more than 9,700 people, roughly 85% will off-base when asked to rate the quality of their diet.
And almost all over estimated how healthy it was.
Those who rated their diet as poor tend to be far more accurate.
They're rating match that to the researchers more than nine times out of ten.
Questions three and four are based on the news report you have just heard.
Question three. What is the main finding of a new study about many Americans?
Question 4. Who attended to rate their diet more accurately in the survey?
News Report 3 It was a heartwarming moment that dozens of Indian
rescuers rallied together to use a crane in order to save an elephant trapped at the
rescue effort took place last week close to an army camp. The elephant wandered out of the jungle
and fell into the well. The army officers heard a noise coming from the well and realized
an elephant was trapped deep inside. The officers then threw in some food for the creature
and called the local forest department for help. Video of the rescue operation shows how the
well, and on to the back of a truck. It was then taken to an examining room for evaluation
of any injuries. The elephant was kept under close supervision for a few days before it was
successfully released back into the wild.
Questions 5-7 are based on the news report you have just heard. Question 5. What does
report say dozens of Indians did last week?
Question 6.
Why did the Army officers call the local forest department?
Question 7. What does the news report say happened finally?

长对话听力原文 / Conversations（英文）

Section B, Directions. In this section you'll hear two long conversations. At the end of each conversation, you'll hear four questions.
Both the conversation and the questions will be spoken only once. After you hear a question, you must choose the best answer from the four choices marked A, B, C, and D.
Then mark the corresponding letter on answer sheet 1 with a single line through the center.
Conversation 1
I need to stop at the bank to withdraw some cash.
Why not just pay with your phone?
Well actually I've stopped using online payments for the past three months now.
Stop paying online.
Oh, you must be worried that online payments aren't secure.
No, they are safe.
But paying online is too convenient and I spent too much money on things I didn't need.
Oh, impulse purchases can be an issue for me too.
I've definitely bought clothes and shoes I didn't need because they were on sale, and paying
with my phone was so easy.
But I found that if I review my spending every night, that keeps me from spending too much.
I tried that strategy, but it just didn't work, because I'd be busy studying all day,
then when I was tired and hungry, I'd use my phone to order food like burgers and other
junk.
Instead of going to the canteen, where I could get a healthier meal for half the price.
Well, what do you do now then?
It seems like you'd have the same problems with cash.
I'd go to the bank once a week, and the rest of the time I keep my bank card at home,
so I can't get more cash out. And I also have a notebook where I record my expenses.
But what prevents you from just going to the bank and getting more money if you want to buy something?
The first month I did withdraw extra cash twice, but I felt guilty about it, and after that I refused to spend more than what I had budgeted. And by now, it's just a habit.
Question 8-11, or based on the conversation you have just heard.
Question 8. Why has the man stopped paying online for the last three months?
Question 9. What problem does the woman say she may also have?
Question 10. What does the man say he could do at the canteen?
Question 11. What is now just a habit for the
man.
Conversation 2.
Please hear me out.
I don't want our son to spend his afternoon doing something he hates, even if it might
prepare him for the future.
What about getting him to join a sport like soccer?
From all the running and training, he could become quite athletic, not to mention the great
physical benefits from exercising outside every day.
Hmm, I don't think he should be doing something so challenging with all his breathing
issues.
What about playing an indoor sport, like badminton?
The environment is easier to control, and he can still get a good workout.
In addition to improving his hand-eye coordination, besides, I could teach him some of the basics
from my time as a bad-mitten player.
Hmm, I'm thinking team sports should be the way to go.
There's nothing like playing as part of a unit to accomplish a goal like winning a game
or even a championship.
He could try basketball since many of the courts are indoors now, and it's a sport that
could help him understand Team Spirit while cooperating with others.
Maybe he could even join the school basketball team when he's ready.
Oh, oh, what about volleyball?
It's a team sport, and they often have mixed gender teams, so he could socialize with both girls and boys.
It's not as popular as some sports, which means he has better odds of possibly getting an athletic scholarship in the future.
I also believe you were a beach volleyball athlete yourself not so long ago.
As I've said many times before, beach volleyball and indoor volleyball are completely different.
Questions 12-15 are based on the conversation you have just heard.
Question 12.
Why is the woman opposed to their son joining a sport like soccer?
Question 13. What does the man suggest their son try in order to understand team spirit?
Question 14. What is one of the woman's considerations in choosing a sport for her son?
Question 15. What does the man say about Beach volleyball?

听力篇章原文 / Passages（英文）

Section C, directions. In this section you will hear three passages. At the end of each passage, you will hear three or four questions.
Both the passage and the questions will be spoken only once. After you hear a question, you must choose the best answer from the four choices marked A, B, C and D.
Then mark the corresponding letter on answer sheet 1 with a single line through the center.
Passage 1.
Lift off is usually the most environmentally harmful stage of any space mission.
With vast quantities of fuel burnt up in a matter of minutes.
For instance, space X's Falcon 9 gets through 112 tons of refined fuel,
All, emitting about 336 tons of CO2.
This is the equivalent produced by your average car driving almost 70 times around the world.
As well as greenhouse gases, rocket engines emit particles that destroy ozone.
These issues are growing more pressing with the emergence of commercial spaceflight.
There were 114 space launches in 2020, but there may be up to 1000 per year in the
in future. Sustainable fuels are the top priority to enable greener space travel. Current
space craft use a variety of fuels, but most are based on fossil fuels. One potentially
greener option is liquid hydrogen and oxygen. Hydrogen can be obtained sustainably by
using solar power to break water down into oxygen and hydrogen. Reusable rockets can cut
down on some of the waste associated with spaceflight. Traditionally, boosters, fuel tanks,
and other components are treaters as expendable. But guiding them back to Earth in a controlled
manner opens new possibilities. Most components from the Falcon 9 can be reused up to 100 times.
Truly environmentally friendly space travel is still some way off. But we already have many of
technologies needed to start limiting its impact on our planet.
Questions 16 to 18 are based on the passage you have just heard.
Question 16.
What do we learn from the passage about the lift off of spacecraft?
Question 17 What happens traditionally to boosters, fuel tanks, and other components in spaceflight?
Question 18. What does the passage say? We already have regarding spaceflight.
Passage 2 Helping to look after a pet,
Conficility, numerous aspects of a child's emotional development.
Research shows that reading to a loyal and non-judgmental companion, such as a dog or cat,
can encourage reluctant readers to read aloud, which will in turn boost their self-confidence.
Having a companion to talk to you about their feelings can also help children feel secure,
and develop communication skills.
A household pet can also cultivate a child's sense of responsibility, as their parent explains
the necessary processes of keeping their pet happy and healthy.
As a child matures, they can then take on more of the daily responsibilities, boosting their sense of independence.
Pets also provide a fantastic subject for research and learning.
Parents can encourage their child to research their favorite pets at the library,
or during a supervised internet search.
Taking children along to the pet shop to buy food and supplies
will support their cognitive development as their passion for learning flourishes.
A child's physical development can benefit greatly from taking pets for walks in the fresh air,
Even their fine motor skills can be utilized in taking care of a beloved animal.
When responsibilities are well-paced and communicated, a child can benefit greatly from
involvement in bringing up a happy and healthy pet.
And of course, if a child doesn't have a pet in their own household, they can still benefit
from all of the above when visiting a friend who does.
Question 19.
A based on the passage you have just heard.
Question 19.
What does research show about reading to a loyal and non-judgmental companion?
Question 20.
How can parents make pets a fantastic subject for their children's research and learning?
Question 21.
How can children still benefit even when their family doesn't have a pet?
Passage 3
A new bill in their higher legislature would require state public colleges and universities to send
respective students a packet of information. This would include costs of college, grants,
and scholarships. It would also include expected monthly loan payments and projected salarate
after college. State representative Adam Matthews is one of the two legislators who proposed
the bill. He said it would give prospective students more information about what to expect
once they graduate. Putting that information in front of them will give them the best opportunity
to match their skills and their dreams to what our schools can provide, said Matthews.
He notes that the state can only regulate public institutions in this way, but he hopes
private institutions in Ohio follow the lead of the state and post similar information.
He believes giving out that information will help Ohio's colleges and universities to be more competitive.
The information will highlight what a great value they have for their very reasonable cost.
Ohio's schools are already competitive.
The state attracts more undergraduate students than it sends to colleges out of state.
Many colleges and universities currently provide similar information on their websites.
This includes tuition, fees, graduation rates and more.
But students need to search for the information.
This bill would require the universities and colleges to send a packet directly to students.
Questions 22-25 are based on the passage you have just heard.
Question 22 What would the new bill in the Ohio legislature require public colleges and universities to do?
Question 23. What can the state only do according to Adam Matthews?
Question 24. What do we learn about Ohio schools from the passage?
Question 25. What is the problem with schools providing information on their websites?
That's the end of listening comprehension.
