Psychologists have long been interested in how we construct our identities and the sorts of strategies that we use to present ourselves in society. New findings suggest that the kinds of __26__ and strategic self-presentation behaviour we see in adults appear at a much younger age than __27__ known.

Research shows that a child' s awareness of social standing comes from adults. Like grown-ups, kids want to be __28__ by those they admire. Interactive experiences may provide opportunities for children to learn about what __29__ a desirable reputation and the kinds of strategies that are effective for __30__ a good reputation in their social environment.

Five-year-olds aren' t just aware of their reputations, they also behave strategically to alter their outward image. They will __31__ their behaviour in order to appear moral or socially good in the eyes of key observers. While we know that adults use a large variety of attributes to manage and create impressions, we don' t yet know whether children __32__ and use the fact that different attributes are valuable at different times to different __33__. It' s important for us to further consider where in this process children succeed in controlling their reputation and where they __34__.

A question to think about is, "What happens even earlier than age five?" Children don' t just show up to the first day of kindergarten and have the idea of reputation pop __35__ into existence. The logical question to ask is, "What happens even earlier?"

Section B 段落匹配

Directions: 阅读下列段落，为每个句子选出所对应的段落。每个段落可能被选一次、多次或不被选择。

A Recently, a leading design federation in the UK warned that the UK could face a creative skills shortage, after the latest figures revealed a drop of almost 10 percent in students studying Design and Technology. These figures showed that the number of pupils that sat exams in Design and Technology fell 10 percent from 204,788 to 185,279 last year.

B Chief executive John Kampfner of the Creative Industries Federation thinks that this drop in figures has worrying implications for the skills pipeline in Britain' s hugely successful arts and creative industries. He said, "We already have skills shortages in many jobs such as animation (动画制作) and special effects." He added: "Engineering, which requires a similar mix of creative and technical skills, also has recruitment problems."

C Many other designers and architects have expressed concern over the future supply of home-grown talent for UK firms, and industry bodies have pointed out that there has been a lack of roots-level support. However, if these designers had visited the Design Museum shop in London earlier this year their fears may have been eased. With £10 to spend, they could have bought a fascinating children' s toy called "Dazzle Racer". An automotive cylinder(圆柱体), it included a wind-up, elastic (有弹性的)-band-powered mechanism, minimal parts, all 100 percent recycled and lots of stickers. It was good fun, simple, eye-catching and very original.

D Well you' d expect the Design Museum to commission and make some interesting items, but this one was different. Designed by a group of six Year 9 and Year 10 boys from Finchley Catholic High School, the toy was the winning entry in the museum' s 2015 Design Ventura competition, which brings the business of design to life for students aged 13 to 16 by challenging them to develop a new creative, sustainable and commercially feasible product for the Design Museum shop and attracts hundreds of entries nationwide.

E "We did Design Ventura in my previous school," says Liam Hourican, Finchley Catholic High School' s design technology curriculum leader. "Then when I changed schools four years ago, I introduced it here because it helps to develop so many skills."

F The theme for last year' s competition was "Move", and Hourican began with three groups working in lunch breaks and after school before selecting the group with the most innovative idea. Each participating school may submit just one proposal. "It' s the taking part and doing the work which is important," he says. "And I never dreamt we' d win."

G Catherine Ritman Smith, head of learning at the Design Museum, is expecting around 10,000 participants aged 13 to 16 to take part this year and says that the project — funded by Deutsche Bank as part of its youth engagement programme Born To Be — is the biggest event in the museum' s calendar. "We started Design Ventura with around 800 young people in 2010 and it has grown steadily since," she says. "Teachers like it because the skills are all transferable and it helps to validate the value of design as a subject," she explains, telling me that nearly 600 schools have taken part so far.

H So how does the competition work? A single-word theme is announced in the summer. This year it is "Change". Schools work with groups to produce imaginative design ideas for a product in simple materials that could sell for £10 in the Design Museum Shop. Participating schools then register by November and eventually submit their design idea. Along the way there is training and support for teachers and tutoring for students from designers. An additional bonus is when the winners see their design on sale in the spring of the following year.

I Hourican and his pupils have happy memories of spending a whole day at the museum, having been selected as one of 10 shortlisted schools to present their idea to a panel of judges, including designer Jasper Conran. Then they worked with the Kin Design Studio in Shoreditch, met designers at their school and attended a lunch with Deutsche Bank employees. The students helped to make decisions and there were plenty of discussions — they changed the product' s name, for example.

J "One of the really useful things about this competition," says Hourican, "is that there' s a commercial element because the product is going on sale for real and the boys had to learn about budgeting and marketing, as well as designing their game." Profits go to charity. "The winning team chooses where it wants the profits to go," says Ritman Smith. "The Finchley Catholic High School product raised about £1,000 for Great Ormond Street Hospital." Winning entries in past years have included a make-your-own cloth kit called Dove Bunting and a threefold, wallet-sized travel game with goals at each end, called Badoiiing.

K It costs the schools nothing to participate in Design Ventura; the professional designers provide their services for free. Among them are architect Asif Khan, a Design Museum trustee who has worked as designer-in-residence at the museum, helping emerging architects. He has recently been commissioned to design the new Museum of London building in Smithfield.

L Another is television presenter and interior designer Naomi Cleaver, who is one of the competition' s judges. "I'm very keen to encourage young people," she says, observing that design brings together other subjects such as literature, art, history, geography and science. "Now that design education is limited in the curriculum, I' m all in favour of competitions such as Design Ventura, which helps to bring the standard curriculum to life," says Cleaver. "And the judging day is terrific fun. Some of these students are very imaginative. One group presented their idea in the form of a puppet show and we see some marvelous demonstration models. "I' m always impressed by the levels of confidence and the support the students get from their teachers."

M Ritman Smith adds: "Design technology has become a tricky subject to make a case for, and we' ve heard of departments closing in some schools. We find that if pupils take part in Design Ventura in Year Nine it can be the trigger which leads them to opt for it at General Certificate of Secondary Education, so we are helping to keep alive something which is crucial to industry and entrepreneurship."

Section C 阅读理解

Passage One

New research suggests that pandas may be at risk of dying out because they are too comfortable. Experts say too much happiness can stop the bears from searching for new mates.

Environmentalists have long believed that building roads or homes near the bears may threaten their survival by "reducing or fragmenting their natural habitats", The Times reported. But the new research suggests that a "modest degree of discomfort and fragmentation" may actually help preserve panda populations.

The research was conducted by scientists from Michigan State University. It concluded that pandas fail to wander off in search of new mates if they find their habitat too comfortable, resulting in a lack of vital genetic diversity.

For their study — outlined in a paper in the journal Conservation Biology — the team looked at genetic diversity and spread among a Chinese panda population. The ideal level of perfectly livable habitat was found to be only 80% of an area, with the remainder either too harsh or too affected by human activity.

The experts concluded that pandas should ideally "be happy enough to thrive, but not so content that they don' t want to move around and find new mates".

Their conclusions about what The Guardian described as this "sweet spot" are in line with the so-called Goldilocks principle: that there can be just the right amount of something. The concept has been applied to a wide range of disciplines, from developmental psychology to economics and engineering.

Claudio Sillero, a professor of conservation biology at Oxford University, told the newspaper that the new findings could have implications beyond panda conservation.

"Most large animals that eat meat live in increasingly fragmented landscapes," said Sillero, who was not involved in the research. "It may well be that the messy nature of their relationship with human efforts induces more animals to scatter or travel further, and might result in greater genetic connectivity and enhanced population persistence."

The most recent count of pandas found that there were more than 1,800 left in the wild, putting them on the list of vulnerable, but not endangered, species.

1. **What do we learn from new research about pandas?**
   - A. They are losing habitat due to the building of roads and houses.
   - B. They have stopped seeking new mates for reproduction.
   - C. They may not adapt to the fragmentation of their habitat.
   - D. They may cease to exist as a result of enjoying too good a life.
2. **What can we conclude from the new research by scientists at Michigan State University?**
   - A. Environmentalists' long-time belief regarding panda conservation may be misleading.
   - B. Housing development near pandas' homes may threaten their survival.
   - C. Pandas' natural habitats are becoming less suitable for reproduction.
   - D. The increased panda population is attributed to the fragmentation of their habitat.
3. **What is the experts' conclusion regarding pandas?**
   - A. It is urgent to provide an ideal habitat for them to thrive.
   - B. It is very important to preserve their genetic diversity.
   - C. Their chances of finding new mates have a lot to do with their habitat.
   - D. Their environment for survival has been continuously worsening.
4. **What can we infer from the passage about the Goldilocks principle?**
   - A. It needs to be confirmed by more studies on pandas.
   - B. It applies to the preservation of pandas too.
   - C. It has implications for future panda research.
   - D. It can be used to locate the right spot for pandas.
5. **What can the new findings do according to Professor Sillero?**
   - A. Help discover new ways for the conservation of pandas.
   - B. Help remove pandas from the list of endangered species.
   - C. Shed light on the conservation of most large meat-eating animals.
   - D. Show the complexity of interactions between humans and animals.

Passage Two

With those born with natural talents, it feels as if they excel without really trying. But what about those of us who don' t have a natural talent? We' ve been told all our lives that if you work hard, you too can succeed. But with the release of Angela Duckworth' s Grit, we are given a new key to success.

"As much as talent counts, effort counts twice," says Duckworth in Grit. She introduces a new concept that talent may be overrated, and if you want real success, what you need is grit the perfect combination of passion and persistence. Even if you have natural talent it' s nothing without grit.

Duckworth says grit is the difference between success and failure. A person who has grit is more likely to succeed than a person who does not. When we think about attaining success — whether it' s landing that job or learning that new skill — our thoughts are immediately burdened by all the things we must first learn. If you want that new job, you have to learn the job skills, then the interview skills, then the dress part — and you must be perfect at all of them. Grit is different because it tells us that perfection isn' t the goal.

Grit lifts the unreasonable expectations off our shoulders. Grit tells us that the door is open wider than we first thought possible. Grit allows us to redefine our goals. Think about it: what' s something you' ve always wanted to do, but gave up because you "don' t have the skills for it"? What' s something you love but aren' t good at?

The real workings of grit are to have sustainable passion and continue to try. Effort means more than your natural ability. Even if you haven' t mastered a skill, grit tells you that you can still succeed if you can transform your passion into action. In a way, Duckworth is giving new hope to people who have shut the doors on their dreams. She is saying it is possible that you can accomplish anything. If at first you fail, then try one more time with grit.

1. **What does the passage say about people born with natural talents?**
   - A. They seem to outdo others without hard work.
   - B. They appear to know all the secrets to success.
   - C. They feel it only too logical to succeed.
   - D. They are bound to excel effortlessly.
2. **What does Duckworth say about talent?**
   - A. It is a new concept much too overrated.
   - B. It proves necessary for big achievements.
   - C. It plays a lesser role in one' s success.
   - D. It is a guarantee for real success in life.
3. **What does the passage say about people thinking of attaining success?**
   - A. They are puzzled how to present their best to the employer.
   - B. They are burdened by their expectation of perfection.
   - C. They will try hard to land a job that fits their skills best.
   - D. They will find themselves lacking in all the skills they need.
4. **How does the author think grit can be helpful to us?**
   - A. It allows us to know what we are good at.
   - B. It opens our eyes to new opportunities.
   - C. It focuses our attention on what we do.
   - D. It lets us reconsider the goals to achieve.
5. **What message does Duckworth try to convey in her book Grit?**
   - A. We should perfect ourselves to ensure success.
   - B. We should stay persistent even in face of failures.
   - C. We can never master a skill without constant practice.
   - D. We can never expect to reach our goals without passion.

No, why? Is he okay? 没有，怎么了？他还好吗?
He had some plastic surgery done. 他去做整形手术了。
What? Why? 什么？为什么?
Do you remember he had a scar on his face? 你记得他脸上有一道疤吗?
Yes, of course. He always had that. 当然记得。他一直都有那道疤。
I've known him since primary school, and I always remember him having that on his cheek. 我从小学就认识他了，一直记得他脸颊上有那个。
Well, he had it fixed. 嗯，他把它修整了。
Fixed? 修整?
What do you mean? 你什么意思?
You can't fix a scar. 疤痕是没法“修好”的。
You know what I mean. 你知道我的意思。
He had an operation done on it. 他动了个手术。
Plastic surgery in order to cover it and make it less noticeable. 做整形手术是为了遮盖它，让它不那么明显。
Oh, well, that's ridiculous, isn't it? 噢，好吧，这太荒谬了，不是吗?
It was noticeable, sure. 虽然是很明显。
But it wasn't an ugly scar. 但那并不是一道丑陋的疤。
It never occurred to me that he should have it taken care of like that. 我从未想过他需要用那种方式去处理它。
I agree. 我同意。
I can understand some scars and physical defects can be ugly and distracting, but not 我可以理解有些疤痕和身体缺陷可能很丑陋且引人分心，但
Johnny's. 约翰尼的那个不是。
In fact, I thought it added character, like it gave him a certain uniqueness. 事实上，我觉得那增加了他的个性，让他有一种独特性。
He must have felt differently though. 不过他本人的感觉肯定不一样。
He must have felt self-conscious and insecure perhaps. 他肯定觉得很局促，甚至可能感到自卑。
No, no, that's not the reason. 不，不，那不是原因。
He was totally fine with his scar. 他对他那道疤完全没意见。
As he said, he had had it for most of his life. 正如他所说，那道疤伴随了他大半辈子。
Then why did he have the operation? 那他为什么要动手术?
Because his girlfriend wanted him to. 因为他的女朋友想让他做。
What? That's so superficial and selfish of her. 什么？她也太肤浅、太自私了。
If Johnny's girlfriend doesn't like him for who he is, 如果约翰尼的女朋友不喜欢他真实的样子，
then she does not deserve to be his girlfriend. 那她就不配当他的女朋友。
You're right. So he is a fool to give in to her like that. 你说得对。所以他居然就这样向她妥协，真是个傻瓜。
But when I told him, he said he loves her and would just do what she wants him to. 但当我告诉他时，他说他爱她，只想按她的意愿去做。
What a fool he is. 他真是个傻瓜。

Passage 1. 短文 1。
Talking is unique to humans. 说话是人类独有的。
An animal might make ten different sounds, but an adult human knows more than 20,000 words. 动物可能会发出十种不同的声音，但成年人类掌握的词汇量超过 20,000 个。
Additionally, we're the only animal that expresses thoughts in full sentences. Researchers 此外，我们是唯一能用完整的句子表达思想的动物。研究人员
don't think language was invented. 并不认为语言是被发明出来的。
Instead, they think it evolved. 相反，他们认为语言是进化而来的。
How did talking evolve? 说话是如何进化的?
There are two main theories. 主要有两种理论。
The first theory is that language started with people making different sounds, mostly imitating 第一种理论认为，语言始于人们发出的各种声音，主要是模仿
the things around them, like animal calls, nature sounds, and the sounds of tools. 周围的事物，如动物的叫声、自然界的声音以及工具发出的声音。
Perhaps they made the sound of wind to comment on the weather, or imitated the sound 也许他们通过模拟风声来评论天气，或者模仿
of a bird, to tell a friend that there was a bird nearby. 鸟叫声来告诉朋友附近有一只鸟。
Then, over hundreds of thousands of years, those sounds turned into words that people began 然后，经过数十万年的演变，这些声音变成了人们开始
to learn as part of their language. 学习并作为其语言一部分的单词。
At some point, people started stringing the words together to form sentences. 在某个时间点，人们开始将单词串联起来组成句子。
The other main theory, which is more recent, is that people started off by gesturing, pointing 另一种较新的主要理论认为，人们最初是通过打手势、
at things with their hands, and imitating actions using their bodies. 用手指向物体以及用身体模仿动作开始交流的。
Eventually, these gestures turned into a full sign language. 最终，这些手势演变成了一种完整的符号语言（手语）。
This theory guesses that after developing sign languages, people eventually started 该理论推测，在发展出符号语言之后，人们最终开始
making sounds along with their gestures. 伴随着手势发出声音。
At some point, they switched to mostly making sounds that became words instead of just 在某个时刻，他们转而主要通过发出声音（即词汇）来交流，而不是仅仅
using their bodies. 使用肢体。
The reason they switched to making sounds, the theory goes, is that talking out loud 该理论认为，他们转向发声的原因在于，大声说话
lets you communicate with someone even when you can't see them. 让你即使在看不见对方的情况下也能进行交流。
Questions 16 to 18 are based on the passage you have just heard. 问题 16 至 18 基于你刚刚听到的短文。

Question 18. Why did people switch from gesturing to making sounds according to the more recent theory? 问题 18。根据较新的理论，为什么人们从打手势转向发出声音?
Passage 2. Is it a good idea to display luxury brands and other signals of status? 短文 2。展示奢侈品牌或其他地位象征是个好主意吗?
It depends on the situation. Studies have shown that people who appear to be wealthy tend 这取决于具体情况。研究表明，那些看起来富有的人往往
to be considered more intelligent, disciplined, and competent than those who do not. 被认为比其他人更聪明、更自律、更有能力。
But new research found that people believe someone who shows off their social status 但新研究发现，人们认为炫耀社会地位的人
cares more about benefiting themselves than helping others. 更看重自身利益，而不是帮助他人。
This means people are less willing to collaborate with them. 这意味着人们不太愿意与他们合作。
Modesty may be key when cooperation is essential, but the researchers also found that in 当合作至关重要时，谦虚可能是关键；但研究人员也发现，
some cases, status signaling has advantages. 在某些情况下，地位信号也有优势。
Experiments showed that participants were less likely to choose someone who signals their 实验表明，当参与者寻找合作型成员加入团队时，他们不太可能选择那些
wealth or status to join a group seeking cooperative members. 展示财富或地位的人。
But participants were more likely to choose that person when they were looking for a competitive 但在寻找具有竞争力的团队成员时，
team member. 参与者更有可能选择那个人。
These findings suggest that people should change how they present themselves depending on 这些发现表明，人们应该根据其社交目标
their social goal. 改变自我展示的方式。
This is the era of social media. People can easily share their wealth and status to large audiences. 在当今社交媒体时代，人们可以轻易地向大众展示自己的财富和地位。
But they need to consider the consequences. Posting about luxury purchases and expensive vacations online may help you to persuade others and frighten competitors. 但他们需要考虑后果。在网上发布奢侈消费和昂贵假期可能有助于说服他人或震慑对手，
but it could also signal to potential friends or future employers that you are unlikely to think about the needs of others. 但也可能向潜在的朋友或未来的雇主传递出你不太会考虑他人需求的信号。
This makes things tricky for people who may want to impress others while also demonstrating 对于那些既想给人留下深刻印象，又想展现自己是
they are a team player. 团队合作者的人来说，情况会变得很微妙。

of animals including elephants which were not native to Egypt. But life wasn't easy for 动物遗骸，包括非埃及本土的大象。但对这些动物来说，
these animals. They probably had short lives and the remains show evidence of severe injuries. 生活并不容易。它们可能寿命很短，遗骸上显示有严重受伤的迹象。
The first public exhibit of animals may have been created by Egypt's Queen Hatshepsut 最早的公共动物展览可能由埃及女王哈特谢普苏特
around 1480 BC. Researchers think the zoo was started with animals brought home from a far-off 于公元前 1480 年左右创立。研究人员认为，这个动物园始于从一个遥远的
land known as Punt. It's unclear why the Queen built the zoo, but it might have been 被称为“庞特”的地方带回来的动物。目前尚不清楚女王为何建造动物园，但可能是为了
to show off her wealth and power. Early zoos are found all over the world. In China, Emperor 展示她的财富和权力。世界各地都发现了早期动物园。在中国，
Wen Wang is said to have built the Garden of Intelligence around 1060 BC. It included deer, birds, 文王据传在公元前 1060 年左右建造了“灵囿”。里面有鹿、鸟
and many fish. In England, King Henry I set up a collection of animals in about 1110 as part 和许多鱼。在英国，亨利一世于 1110 年左右建立了动物收藏，作为
of the Royal Estate. His collection included tigers and lions. This collection eventually moved to 王室地产的一部分。他的收藏包括虎和狮。这些收藏最终于 1235 年搬到了
